Dear Sir/Madam,

Firstly I am appalled to find details of the intended works only available days away from the cut off date (23rd November) for complaints or suggestions. Why was this plan not made public weeks ago so coherent conversations could be held in the community?

The proposed site and traffic are quite incomprehensible when another site at Highbridge Farm would be far more suitable. Has anyone actually visited the area or is it just a desktop plan drawn up by people with no physical knowledge of the area?

Do Twyford residents know of the proposed increase in HGVs through their narrow roadway? Has anyone consulted SGN re intended gas works in that village that would close the route? Some months ago SGN had a consultation display in Colden Common while working on Main Road in Colden Common. I took the opportunity of asking when and how they would work in Twyford with its narrow roadway and was told that the road would be closed as there was no room for traffic to manoeuvre alongside works.

I would suggest a major rethink is due or at the very least some meaningful, public communication about this very disruptive plan.

Yours faithfully.

Patricia Lavery
