To Whom It May Concern

**Written representation**: Construction Compound L-10

I am a [redacted] living at [redacted], on the corner of [redacted]) and Brambridge.

I have only just learned of this proposed building works from my neighbours, and I received no notification / information from Southern Water. I therefore did not submit relevant Representation by August 2026. I ask you to accept this representation and to register me as an interested party.

**Construction Compound L-10,** shown on Sheet 25 of the Works Plans [APP-014]:

I object to a compound of this size positioned close to any residential properties. There is land opposite the chosen location which is industrial use, and on nearby Highbridge Farm which is within a few hundred metres. Both are alternative options.

### Construction traffic and road safety on the B3335

Southern Water forecasts the following for L-10 (Ref: Report, Table 1, drawn from the Framework Construction Traffic Management Plan [APP-414]):

| Vehicles | Average two-way trips per day | Peak two-way trips per day |
|---|---|---|
| Light goods vehicles | 119 | 260 (for 4 months) |
| Heavy goods vehicles | 19 | 75 (for 4 months) |

The works are predicted to last 17 months. All HGVs would travel from the M3, Junction 11, and along the B3335. **This road already carries a high volume of traffic, floods regularly and there is a 4-way staggered junction which is a <u>known</u> accident area.**

**Working hours: noise and light pollution, Bank Holiday and night working**

Any work outside the proposed standard hours would adversely and directly impact on my health and my sleeping, as my bedroom faces the B3335 - as already experienced during the sewage flooding issues. It was after 10 days of non-stop noise and light pollution that I was irreversibly put [redacted]

Yours sincerely

Margaret Hamilton
