REF: _____

MRS INA. C. EVANS
4, MARTYN CLOSE,
COMBWICH,
NR BRIDGWATER.
TAS 2RD.

Dear Sir/Madam

The intentions of E.D.F. for the Village of COMBWICH is causing Great concern + distress.

I don't think anyone in the Village is against the Power Station, but we all want our Village to Stay a Village, not the things E.D.F. want for us. We do not want to become a PORT.

INDUSTRIAL ESTATE, BUS DEPO, HEAVY Good DEPO, CONTAINER PARK OR have a Factory for the construction of largitams for the Point, all of wich will be working 24/7 - 4:30 AM untill 12pm. This will create Noise + high pollotion also Traffic congestion for the whole area not just COMBWICH.

In stage ① of the consultations there was no mention of any of the above, that being so there was no opportunity to object at that time

In stage ② they did not put on display their intentions in the Village Hall or make mention in the Newletters we received, if this information was anywhere it was + is hidden in their documentation, all 90,000/100,000 pages of it. E.D.F.'s consultations were and are inadequate + devious to say the least.

E.D.F. is going to build a temporary jetty at the Point, why can't ^{they} build a permanent one. or a Road from Dumball to the Point.

+ avoid Cannington + ComBwich
These will solve most of these problems
for the next 50/75 years or so when
C.D. E&F reactors are built at the Point.
I would be greatfull for a reply
+ your comments

Yours Greatfully
Mrs B. E. Evans
