Subject: RE: HPRM: Wylfa Newydd Generating Station

Dear Hannah and Simone,

Thank you for your notification.

The Netherlands government would like to participate in the Environmental Impact Assessment (EIA)-procedure for a new nuclear power station at Wylfa, Anglesey, North Wales.

In our opinion the attached screening assessment gives not enough information to make a judgment about the risk of transboundary pollution on the territory of the Netherlands, especially in case of a major accident or incident of the new nuclear power plant. We expect that the EIA-documentation will give good and full information about this issue.

The Netherlands government also would like to be registered as an 'interested party' during the 'pre-examination stage'.

Please use my name and email addresses as the main contact point and please keep mrs. Johanna Nes, Coördinator International from the Authority for Nuclear Safety and Radiation Protection (ANVS) Johanna.nes@anvs.nl in copy.

Kind regards,

Germt de Vries
