---

Dear Sir/Madam,

On 20<sup>th</sup> February 2019 we learned that the North Wales Connection project was cancelled and that this was confirmed by the Planning Inspectorate. However, we have since become aware that the DCO submitted by Horizon contains a Statement of Common Ground between Horizon and National Grid (Doc. ref. EN010007-003088-18), which refers to a 400kV overhead line. This means that some elements of the document are no longer correct. For example, Section 1.2.3 states, 'National Grid is promoting a second 400kV connection between the Wylfa and Pentir substations.' And there are many more of such inaccuracies. In light of this, it would be entirely unacceptable for any development consent order for the power station to include explicit reference to overhead lines.

As there is no technical, energy or planning need for transmission by way of overhead lines, this document requires urgent revision in order to reflect the current situation accurately, i.e. National Grid's decision to cancel their connection project, and thereby enhance overall transparency of the process.

We therefore request that you ensure that National Grid and Horizon undertake appropriate revisions to this, and any other, documents, by removing all reference to overhead lines, prior to completion of the examination of the power station DCO.

Thank you for giving this your attention.

Yours sincerely

Dr Marion and Robert Jones
