Subject: Comments on document ENO10007-003088-18 for deadline 7
Date: 10 March 2019 23:46:40

I understand that the DCO submitted by Horizon includes a Statement of Common Ground between Horizon and the National Grid document reference above which refers to a 400kv overhead line. The North Wales Connection project has I understand been been cancelled by the National grid and this was I am told confirmed by the Planning inspectorate on 20 February 2019.

It has been made apparent that there are inaccuracies including section 1.2.3. "National Grid is promoting a second 400kv connection between the Wylva and Pentir substations"

Given the above it would be inappropriate for any DCO for the power station to include overhead lines specifically. There is no technical energy or planning need for transmission to be via overhead lines. Revision of this document is required to reflect National Grids decision to cancel their connection project entirely.

I should ask you to ensure that National Grid and Horizon make appropriate revisions to this, and any other documents, to remove all reference to overhead lines, before the examination of the power station DCO is complete.

Regards. Dr. Frederick Horrocks
