

## **Appendix A– Part 2 – SZC Co. proposed approach – Email 23 December 2020**

Dear [REDACTED] and [REDACTED]

As previously advised by [REDACTED] at EDF, PINS issued a procedural decision on 22 December requesting the following:

*'provide detailed photomontages and wireframe imagery from local viewpoints for the Accommodation Campus and land east of Eastlands Industrial Estate. Please discuss and agree locations with East Suffolk Council and Natural England.'*

In response to this we would like to agree locations for the photomontages and wireframe imagery with you in a proposed call at 11am on 4 January. I attach a hyper link to the suggested viewpoints in advance of our discussion and would also refer you to the text below.

We suggest that the locations are selected from existing LVIA assessment viewpoints for consistency and have listed these below. These views have not in all cases been used as agreed construction phase views in the original LVIA, but we are pleased to use them for this purpose. In addition, viewpoints 7 and 11 would comprise a wider panorama than the original LVIA representative view point, allowing the areas in question to be apparent in the view. These panoramas are also verified quality.

Having discussed matters with [Redacted], we suggest the following viewpoints for consideration and draw your attention to the notes regarding the type of image we propose. In the case of Big Field, given this is a construction area we propose wireframes and suggest we also prepare a simple 3D model of the parameters and provide an aerial view (much like that for the campus in the DAS) and apply coloured to the parameter blocks to ease interpretation of the wireline views.

### **Accommodation Campus:**

- VP 7 - original representative view to now included the full panorama which takes in views south down Eastbridge Lane towards the Campus - photomontage
- VP 8 - original representative view and construction parameters view – photomontage
- VP 28 - original representative view and construction parameters view – wireframe

### **Land east of Eastlands Industrial Estate - Big Field:**

- VP 3 - original representative view – wireframe
- VP 27 - original representative view – wireframe
- VP 11- original representative view to now include the full panorama which takes in views northwest towards Big Field - wireframe
- VP 32 - original representative view and construction parameters – wireframe

We also include a key plan and legend for the construction images for ease of reference.

Link: [REDACTED]

[REDACTED]

We look forward to discussing the above on the 4 January. May I take this opportunity to wish you a good Christmas break and a Happy New Year, after what has been an extraordinary 10 months.

My regards
