FW: DCO Application - Sizewell C New Nuclear Power Station and Associated Works

**Date:**

26 March 2021 10:04:39

---

Dear Sirs

The Suffolk Preservation Society (SPS) is a non-political, independent, self-funding charity whose charitable objects are to promote the conservation, protection and improvement of the county's physical and natural environment for the public benefit by ensuring any change is undertaken sympathetically and to the highest level of design and sustainability.

To that end, the Society has fully engaged with EDF during the many consultation phases of this project and has consistently raised issues regarding the significant impacts on the special qualities of the Area of Outstanding Natural Beauty; the significant impacts on the historic environment including the setting of designated heritage assets and the need for an adequate mitigation fund for the historic and built environment. The Society's concerns were also set out within our comprehensive relevant representation in respect of the DCO application which we request is given full consideration by the Planning Inspectorate.

The complexity and the scale of the DCO process requires a sustained level of capacity to appropriately engage with the Examination. The Society's capacity is fixed and our responsibilities are countywide and therefore we will not be making further representations or taking any further involvement in the Examination process.

Yours faithfully

**Fiona Cairns IHBC MRTPI**
