Subject: Fwd: Sizewell C project written representation, deadline 2.
Date: 25 May 2021 10:48:51

Please find my written representation, this is a copy of my words spoken at the open floor hearing.

Having moved here 27 years ago looking to find a harmonious way of living with the local community and the natural world, I am frightened to think of a different way of life with the stress of the possible build. My Particular worries are :

-
- the destruction of our beautiful Suffolk countryside and the effect on its rare wildlife.
-
- the much increased traffic on the local roads leading to jams and difficulty with local driving
-

All of this seems intolerable and it is no exaggeration to say that I fear for my physical and mental health as I know others do.

- I am a regular member of the church in Theberton, I travel to the other churches in the area Middleton, Yoxford, Sibton, Peasenhall, Westleton, Darsham and Dunwich this journeying will become a nightmare when/if the construction goes ahead due to closed off roads and new road layouts.

When travelling to our holiday in North Devon we passed through the devastated area of Hinckley, this is meant to be sympathetic, it's not. If this is remotely like what will happen in this beautiful area I will grieve.

We live in harmony with nature, we are the caretakers of our planet, how totally irresponsible it is to leave behind fuel rods and other nuclear waste for future generations to deal with. This will be live for hundreds of years.

Speaking to local fishermen they talk of a lack of fish; if these power stations go ahead millions of fish will be sucked into the cooling system and killed, bird life will suffer. Knowing this was going on how can we say that the build is environmentally sound?

I wake up each morning to the sound of birds singing, fresh air through the window, safe lanes to walk down, happy holiday makers cycling past. This is the place I moved to, NOT an industrial, noisy, polluted world where no people in their right minds will want to visit, and if they do how will they get here?

The A12 is very busy now, as are other roads into the area, with the addition

of hundreds of lorries and support traffic the problems and accidents will increase. I can't imagine how my daughter will ever get here to visit.

I am stressed enough now with the anticipation of what might happen, as are many people in the area. I dread to think how we will be if it goes ahead.

TinaNeal.
