

Good Morning

I am writing to you in regards to the proposed construction on Sizewell C. I have raised concerns before but I want to raise these again and to reiterate my reasons why this would be a catastrophic decision if this build were to go ahead.

This would completely ruin and change East Suffolk for good and definitely not for the better. This is a beautiful place, a lovely landscape with fantastic wildlife. This is all in danger and this build should not go ahead.

There are so many wrongs with this project and I cannot see no rights.

On a personal level, this would/could cause chaos with getting to work, my job would be at risk as I need to travel on the A12 every day to get to work. A journey, which at the moment takes around 15 mins, would easily take an hour maybe more, who knows. My elderly parents who live in Beccles, need constant care and trips to the James Paget Hospital which again, I would need to travel on the A12 to get to them. Traffic would come to a stand still. My son, who works in Woodbridge, travels along the A12 everyday. He is a key worker, a postman. Where would this leave him? You need to understand that on a regular day the A12 is full of a constant flow of traffic and this is without the proposed 700 lorries and 10000 workers which would then use it. It only takes 1 set of traffic lights along there somewhere and you can notice the difference, the hold ups. How do you think the effect will be when they build the park and rides, the roundabouts etc. I am telling you now it WILL be hell! Anyone that lives here, visits here or passes this way to get to and from work will tell you.

Please think seriously about the overall effect on the East Suffolk people, the wildlife, the lovely places of interest, Minsmere and the lovely landscape. This is an area of outstanding natural beauty. Don't let it be gone forever.

Thanks
Alison Cook
