Subject: PLEASE DO NOT BUILD SIZEWELL C
Date: 07 June 2021 12:48:27

I am SO opposed to the building of Sizewell C on the basis of:

1. The appalling cost to global warming in terms of a level of CO2 pollution that will not be off-set until such a date that global warming will be beyond slowing down/reversing;
2. Coastal erosion in this area is accelerating and the works planned will increase the problem with any apparent sea defences being proposed not yet revealed in design form making any confidence in their adequacy entirely meaningless.
3. The decimation of precious land, nature & sea habitats some of which can only be found in this area.
4. The hugely detrimental impact during its' construction to the surrounding towns whose main incomes are derived through tourism. The traffic infrastructure in this part of Suffolk is simply wholly inadequate for the proposed amount of site traffic that will be using it during the proposed construction. In fact, the proposed numbers of vehicles, lorries and buses amongst them, is an entirely ludicrous burden to put on our, mainly, single lane roads.

The building of Sizewell C has been entirely ill thought out with regards pollution, impact on global warming, impact on the local population, wildlife, economy and coastline. The project is still not fully funded. Stop this now and work on finding alternatives.

Sarah Seccombe
