Re Proposal for planning application to build power stations Sizewell C and D

I object to this proposal in the strongest of terms for the following reasons:

- 1 The coast here is highly unstable and prone to flooding (I live here and experience this). The changing weather patterns due to climate change mean both are increasing.
- 2 It is an outrage to ruin an area of Outstanding Natural Beauty and delicate irreplaceable habitats. Ask any scientist, as opposed to 'planner', and they will tell you no amount of planning or reconstruction can put them back with the thousands of species inhabiting them
- 3 Rapid advances in new technologies for energy production make this proposal out dated and massively overspent.

Please note, this is only a proposal at this stage

Yours sincerely

Annie Hitch
