I am opposing the build of this additional nuclear power station.
I absolutely cannot believe the fundamental process of this being built next to one of the last few incredible nature reserves we have in the uk.
I have lived in Suffolk for 20 years and enjoy the peace and quiet.
I left London to get away from traffic and pollution, this proposal will change all of this quiet lifestyle.
The tranquility of the lanes near the coast here will be lost forever.
It's going to cost billions and surely new technology will be in place in another decade of greener power ?
I am so mortified that this may happen .. I may well move again.
I swim in the sea here regularly but fear the coast line may well change forever.
I have read about Hinkley Point and the exceeded budget. The photographs of the massive extent of the colossal area that it has encroached on and feel Sizewell may we'll be of a similar disaster.
I'm sure this is all to do with money and greed.
I would also like to mention a friend of mine worked at Sizewell many years ago ..for a very short time cleaning .. regularly they had to stand the mattresses outside the staff bedrooms as they had been saturated with urine from workers being so drunk ! How irresponsible for a nuclear power station!
There is so much opposition for this from Suffolk residents , are we just ignored or are we listened to ?
Thank you for your time

Yours faithfully
Miss Angela Power
