

ExQ3: 09 September 2021

Responses due by Deadline 8: 24 September 2021

Application by NNB Generation Company (SZC) Limited for an Order Granting Development Consent for The Sizewell C Project

The Examining Authority's third written questions and requests for information (ExQ3)

Issued on 09 September 2021

Responses are due by Deadline 8: 24 September 2021

PART 2 OF 6

Bio.3 [Biodiversity and ecology, terrestrial and marine](#)

HRA.3 [Habitats Regulations Assessment](#)

ExQ3	Question to:	Question:
Bio.3	Biodiversity and ecology, terrestrial and marine	
Part 1 - General		
Bio.3.0	The Applicant, ESC, SCC, Suffolk Wildlife Trust	Protected species licensing, non-licensable method statements and the CoCP (Associated development, terrestrial ecology, section 6 epage 178 and following) - Code of Construction Practice. Doc 8.11 revision 5 submitted at Deadline 7-. Are ESC, SCC and SWT content with the amended CoCP and various non-licensable method statements? If not, what do they require? Do Natural England have any views in relation to these. .
Bio.3.1	Natural England, MMO	A number of questions were raised seeking information and input from Natural England and MMO during ISH10. Those at agenda item 5 were published by the ExA on 31 August 2021 following ISH10 and a note of the times at which other questions relevant to them were raised was sent to them later. For ease of reference, the ExA sets out those points below. Please will Natural England and the MMO respond at Deadline 8. In the event that their D7 responses or submissions in lieu of attendance have covered these points to their satisfaction, please will they state where, with EL references, paragraph and electronic page numbers.
Bio.3.2	Natural England MMO	<p>Agenda item 3.a</p> <p>Sabellaria spinulosa, in general and progress with a Sabellaria mitigation and monitoring plan which is awaited from the Applicant - see also Natural England’s position set out in their post-ISH7 submission [REP5-160] (page 21 of 21) what DML conditions are proposed for mitigation and comments on likelihood of presence and need for compensation (see also MMO’s REP6-039] paras 1.3.6.6 and 1.3.7.9).</p> <p>Q(a) Where is the mitigation and monitoring plan, is Natural England content with it, likewise MMO</p> <p>Q(b) Natural England say three locations for intakes; Are there not two intakes of which the northernmost avoids SS as it is not on reef. Southernmost has to be on reef, does it not? What is the third? Was it a candidate rejected? (The Applicant clarified there are two heads per intake and three potential locations.)</p> <p>Q(c) Will there be a condition in the DML requiring mitigation of any effects on SS? And also will an in principle monitoring and mitigation plan be submitted to the examination as suggested by MMO at para 1.3.6.6? When?</p>

ExQ3	Question to:	Question:
Bio.3.3	Natural England MMO	<p>Agenda item 3.b</p> <p>To understand which issues considered at the Hinkley Point C water discharge permit acoustic fish deterrent appeal and in dispute are common to the Sizewell DCO application; and who was involved? (Please will the MMO and Natural England take into account the Applicant's response at ISH10 and its post-ISH10 submissions in replying.</p>
Bio.3.4	Natural England	<p>Agenda item 4.a</p> <p>Fen meadow proposals, including Pakenham – to understand in particular Natural England's position on need, quantum and the likelihood of success</p> <p>ExA As Natural England are not able to be here today, the ExA is going to put this question to the Applicant to ask for their understanding of Natural England's position and their reply, and also so that Natural England can speak for themselves in writing at Deadline 7. The ExA has their note in lieu of attendance.</p> <p>The policy in EN1 para 5.3.11 is not normally to grant where there is a likely adverse effect on an SSSI, and that where after mitigation there is an AE on a site's notified special interest features an exception can be made where benefits outweigh impacts on the site as a SSSI and on the national network of SSSIs. You are taking 0.4 something ha of fen meadow, call it 0.5 ha. (a) That, it seems to me, is the Natural England position on need. Q (b) Please will you explain to me fairly, putting it in the best light, how Natural England justify the total land take at Halesworth, Benhall and Pakenham put together. Q (c) What made the Applicant think at the time of the Application in May 2020 that Halesworth and Benhall alone would be sufficient? And Q(d) why at Deadline 5, 23 July, would Natural England describe the possibility of success thus: "To summarise, our advice is that creating compensatory habitat of the same quality to that which will be destroyed will be extremely difficult, if not impossible". It was said by Mr Lewis for the Applicant at CAH1 Part 1 that this was a hangover from an earlier stage in the Examination. Is that it right. It was their clearly stated view at D5, 23 July.</p> <p>Q(e) Will the Applicant explain to its position but only in so far as it needs to add to anything it said at CAH1 Part 1. The ExA notes that the AoS of EN6, at para 5.13 says: There is potential for habitat creation within the wider area in order to replace lost 'wet meadows' habitats of the Sizewell Marshes SSSI but it may not be possible to fully compensate for losses to this habitat ... develop and ecological mitigation and management plan to minimise the impacts". Does the Applicant draw an comfort from</p>

ExQ3	Question to:	Question:
		this or rely it? There is a question there also for Natural England – does this para allow for some failure of fen meadow recreation, and how in the light of it is the fen meadow at Pakenham justified? Q(f) Is the money for the Fen Meadow Contingency Fund yet agreed?
Bio.3.5	Natural England	Agenda item 4.e District licensing – changes and effects Q(a) The ExA's understanding is that it is only for newts and has no separate statutory basis. But in the absence of Natural England, please can ESC tell us if we are right or not and explain what difference it makes? (See also Natural England Blog post of 11 Dec 2020.)
Bio.3.6	Natural England	Agenda item 4.g Biodiversity net gain – the effect of the new metric and assessment of SSSIs Q(a) To the Applicant – (i) what are you intending to do in relation to Metric 3.0? (ii) If you are putting something in, when will we get it? (iii) The ExA notes that at the Natural England website it is stated that "Users of the previous Biodiversity Metric 2.0 should continue to use that metric (unless requested to do otherwise by their client or consenting body) for the duration of the project it is being used for as they may find that the biodiversity unit values metric 2.0 generates will differ from those generated by Biodiversity Metric 3.0". Does the Applicant wish to say in relation to that? Please will Natural England comment.
Please answer the following questions in the event that the change request for the desalination plant is accepted		
Bio.3.7	Natural England, MMO	The ExA understands that Natural England and the MMO did not respond to the consultation. Please will they both set out their responses to the proposed changes?
Bio.3.8	Applicant	The Applicant explains that the intake screen and pipework would require periodic shock chlorination, which would be flow controlled and angled inwards to prevent chlorine emissions to the environment. Why does the outfall pipe not also need chlorination or treatment?
Bio.3.9	Applicant	Fourth ES addendum Bk 6 6.18 Vol 1. At para 3.9.13 it is said that environmental design and mitigation measures have been secured by Reqt 8. Is that a reference to the Construction Method Statement and if so to which parts and paragraphs? If not, please

ExQ3	Question to:	Question:
		state how Reqt 8 does in fact secure this as the only other documents referred to in Reqt 8 are parameters plans.
Bio.3.10	Applicant	Same document. At para 3.9.142 effects on commercial fishing are considered. It is stated that "A review of the commercial fishing off Sizewell and the wider area is provided in Volume 2, Appendix 22F of the ES [APP-323]. Shore-based observations suggest that most fishing near the proposed BLF is carried out by potting and trawling vessels". Should the reference to the BLF be to the salination plant intake and outfall headworks?
Bio.3.11	Applicant	Same document. Does para 3.9.157 relate to and therefore be headed Benthic-pelagic and pelagic larvae sensitivity? It is currently simply "sensitivity".
HRA.3 Habitats Regulations Assessment		
HRA.3.0	The Applicant	Marine Water Quality NE has identified concerns regarding water quality impacts to numerous European sites, resulting from bentonite breakout [RR-0878][REP2-153]. At Deadline 3, the Applicant [REP3-042] committed to updating the CoCP to include information to address this point, but this was not addressed in the CoCP submitted at Deadline 7 (Revision 5). Can the Applicant update the CoCP to address this matter?
HRA.3.1	Applicant	Impacts to breeding birds (including marsh harriers) The Applicant has explained [Doc. 9.71, HRA.2.8] that the works to create the new wetland habitats in the proposed marsh harrier compensatory habitat area on the EDF Energy Estate ('the MHCHA') would not be undertaken in February-October, to avoid impacts on breeding birds (including marsh harriers) and that this would be secured in a future update to the CoCP. This is not reflected in the CoCP submitted at Deadline 7 (Revision 5). Can the Applicant update the CoCP to address this matter, or otherwise explain how this commitment is secured in the dDCO?
HRA.3.2	Applicant	Marsh harrier compensatory habitat area on the EDF Energy Estate ('the MHCHA') The Applicant has stated that the new wetland habitats proposed as part of the MHCHA would be created in the first winter of the construction phase following the grant of any

ExQ3	Question to:	Question:
		<p>DCO (currently estimated to be winter 2022-2023) [REP2-088, NV1] [REP6-002] [Doc. 9.71, HRA.2.8].</p> <p>The Applicant has confirmed this is an "absolute commitment" in [Doc. 9.85] submitted at Deadline 7. How is this specific commitment secured in the dDCO (or other legal mechanism)?</p>
HRA.3.3	Applicant	<p>Land at Westleton</p> <p>a) The Applicant does not appear to have proposed specific monitoring measures relevant to marsh harrier on the land at Westleton, although the Marsh Harrier Compensatory Habitat Report for the Westleton land [REP3-053] confirms that <i>"...the status of the habitats will be monitored by the SZC Co. land management team seasonally to ensure appropriate management is undertaken"</i>. Could the Applicant confirm whether it intends to undertake monitoring at Westleton and if so, provide any further details and confirm how this is secured?</p> <p>b) Regarding provision 12.1 of the Deed of Obligation ('Habitats Bond') (Rev 7) submitted at Deadline 7, are the Local Authority bound to delivery of the Marsh Harrier Compensatory Habitat Report in line with Requirement 14C of the dDCO in the situation of a "Default Event"?</p>
HRA.3.4	Applicant	<p>Minsmere Monitoring and Mitigation Plan (MMP) [REP5-105]</p> <p>The Applicant has confirmed at Deadline 7 [Doc 9.73] that measures proposed by NE in [REP6-042] to mitigate impacts from construction workers are acceptable and can be reflected in the MMP. Can the Applicant update the MMP accordingly?</p>
HRA.3.5	Applicant	<p>Additional mitigation for recreational pressure</p> <p>Can the Applicant provide an update with regards the discussions on the further access improvements in the local area, as referenced in Doc 9.73, Appendix A - Response to NE, RSPB/SWT responses to Deadline 6?</p>
HRA.3.6	Natural England	<p>Re. Question CG.2.6 of ExQ2 [PD-034]</p> <p>In NE's response to Question CG.2.6 of ExQ2 at Deadline 7, NE requested <i>"...that the ExA defer our input to Part 3 of Examiner's questions, when we will aim to provide a response by Deadline 8"</i>. Can NE please provide its response to Question CG.2.6 of ExQ2 [PD-034].</p>

ExQ3: 09 September 2021

Responses due by Deadline 8: 24 September 2021

The Planning Inspectorate
Yr Arolygiaeth Gynllunio

ExQ3	Question to:	Question:
HRA.3.7	Natural England	<p>Southern North Sea (SNS) SAC (Marine mammals) (Physical interaction with project infrastructure – collision)</p> <p>NE's RR [RR-0878] highlighted the risk of collision to mobile species including from marine vessel activity, capital dredging, piling and drilling works. Subsequently, NE [REP2-153] confirmed it had no further concerns regarding physical interaction between project infrastructure and marine mammals. Can NE please confirm what information resolved their concerns?</p>
