Subject: ISH 11 Submission on Soft Coastal Defence Modelling and BNG SoCG

Date: 25 September 2021 08:10:29

Dear Sizewell C team.

I am writing to inform you that the applicant requested a copy of my final ISH 11 submission on the Soft Coastal Defence Modelling and HCDF. I provide copy to them on Wednesday 22nd September and also copied Coastal Partnership East (ESC). This is the same document I submitted yesterday to the PINS website for Deadline 8.

A copy has also been provided to the Environment Agency and Office for Nuclear Regulation for comment as we are due to have one of our regular 6 monthly community sessions with the EA/ONR on progress with the environmental and nuclear site license considerations this Tuesday, 28th September.

With regard to the request for a SoCG between myself and the applicant on Biodiversity Net Gain, we held a session on Tuesday 21st September where the issues were discussed and an agreement to exchange metric 2 spreadsheets and other materials was made. However, time is now short as I will be away on a walking holiday with little access to internet and no computer access. The applicant is aware of my holiday dates and I await the promised documents, but time is very tight. Whatever happens I will submit something before I leave but the stage, it is difficult to say.

On a purely administrative issue, it is regrettable that functional spreadsheets cannot be accommodated as a document type on the PINS website as it would certainly assist in allowing proper and possibly earlier evaluation of these more complex issues. Perhaps something to take away more generally for future DCO examinations.

Regards,

Paul Collins
