Subject: Sizewell C project my ref 20025803
Date: 09 October 2021 09:20:52

Dear Sir,

I have followed the Planning process intently .

Nothing has altered my view that a large nuclear station would benefit the Sizewell area given the climate emergency and the shortage of water here.

With little transport structure in place and the natural sensitivity of the area the project is unnecessarily destructive and certainly not green as it's waste remains radioactive for 100,000 years and I understand uranium is a depleting resource and not renewable.

People enjoy the area for much needed rest and restoration.

Tourism will be ruined and the effects on people's physical and mental well-being potentially damaged.

Nuclear build will take time. All the expert opinion states that is the one thing which is not negotiable.

Please, help the planet and reject this proposal.

Thank you,

Julia Brown
