**Subject:** On behalf of future generations, PLEASE stop Sizewell C  
**Date:** 08 October 2021 15:14:16

---

There are many environmental reasons why it is a terrible idea, not least the prospect of intergenerational nuclear waste and huge demands of potable water

But leaving all of those aside, it is simply an insanely expensive way of generating electricity.

Renewables are becoming cheaper and better by the day, whilst nuclear energy is getting more expensive by the day.

PLEASE, on behalf of my children and yours, halt this crazy idea now.

Regards

Toby Hammond
