Dear UK Government officials,

I urge you on behalf of Mother Nature and our planet Earth to reconsider this proposition & consider it one of the BIG mistakes of the 21st century along with HS2 which must be on your consciences by now.

HS2 will be obsolete with so much of the population working from home who on earth will want to use this service?

Investing in the already in place infrastructure is surely the way to go.

I beg you for your full consideration & passion to help make England a green and pleasant land once again for one and all.

yours sincerely,

Ms. Jiltina Carlton
