Hello, regarding the NMC consultation which ends today it may be pertinent for the PAC committee and planning inspectorate to be understanding some of the issues related to the Non Material changes and other issues raised during the previous consultation and the one just ending. There could be cost implications arising from the NMC changes particularly transport related and additional compensation for residents impacted by the proposed changes. Wider planning issues could also be exposed as part of a wider PINS enquiry .The Public accounts report may be found at [redacted]

EN 010012
