**Subject:** Sizewell C - EDF application for DCO

Dear Planning Inspectorate

You will find below a letter from my wife and I urging them to delay their application for a Development Consent Order for the Sizewell C Development until it is absolutely clear that all agencies, councils and communities will be able to fully engaging in the rigorous examination of their submission

You will already be aware of the total dissatisfaction with substance of their four stages of public consultation, particularly in regard to the environmental impact of their proposals

We have a very real fear that EDF will exploit our present national crisis in any way it can to minimize the scrutiny that their application demands

Yours truly

Judith Croton and John Rea Price

**Subject:** Letter to Mr Cadoux Hudson: Your proposed application for a DCO

Dear Mr Cadoux Hudson

I am heartened that you have at last bowed to pressure to defer your application for a DCO for 'a few weeks'. If we are to believe the Planning Inspectorate website, this will in fact only be for a month.

With the country going into ever further lockdown, London ( and even the Prime Minister himself) paralysed by the virus, it is inconceivable that the Inspectorate, Statutory Bodies and local authorities will have the capacity to give the detailed consideration that your lengthy and complex application will require. This is particularly the case in view of the cursory and dismissive way in which your company has responded to community concerns , particularly on the environmental impact of your development, at every stage of our public consultation so far.

Your press statement of yesterday almost suggests that you are welcoming the impact of the virus at a time when the country is at its most vulnerable as a way of sneaking your application through and of avoiding the rigorous evaluation that it demands.

John Rea Price

Judith Croton
