EA3-AVI-CNS-CON-IBR-000001 - NATS MSC (1).pdf; EA3-GEN-CNS-COM-IBR-000228 NERL Discharge Letter.pdf;

Good Afternoon, [REDACTED]

Further to our recent correspondence, I am writing to formally request the Secretary of State's written confirmation under PRMS paragraph 5 for the East Anglia Three project, to enable discharge of Requirement 38.

We have now received the NERL/NATS Discharge Letter, confirming that the agreed radar mitigation has been implemented to their satisfaction.

In line with your guidance, please find below our summary of how PRMS (para 5) has been met, cross-referenced to evidence provided with this request.

Summary of PRMS Paragraph 5 Compliance**PRMS 5.1 – Mitigation installed, integrated, and validated by NATS**

- TMZ – Implemented and published

Evidence: UK AIP eAIS – ENR 2.2 (Section 4) and ENR 6.75 confirming the TMZ is live (25/12/2025).

The TMZ is now live and listed in the latest version of the UK AIP [eAIS Package United Kingdom](#)

- Radar Blanking – Installed, integrated, and validated

Evidence: NATS/NERL Discharge Letter (dated 20 January 2026), confirming that the mitigation measures described in PRMS Annex 1 have been implemented.

PRMS 5.2 – Maintenance, management, renewal, update, and decommissioning arrangements in place

Evidence: NATS Mitigation & Services Contract (MSC) already provided to DESNZ but attached again, which sets out the required through-life maintenance and operational obligations for the mitigation measures.

As previously mentioned, and to support programme planning, we kindly request that the Secretary of State's decision is issued by 14 February 2026, to ensure confirmation is in place ahead of turbine erection. NATS have confirmed they are ready to respond promptly when you consult them.

I look forward to receiving the Secretary of State's decision, but if there is anything further required, please let me know.

Kind Regards
