**Appendix 11.3** is supported by the following annexes:

Annex number	Title
<b>Annex 1</b>	Initial List of UK and Other European Offshore Windfarms Considered Within the CIA Screening
<b>Annex 2</b>	Initial List of UK Wave and Tidal Projects Considered Within the CIA Screening

## Glossary of Acronyms

CIA	Cumulative Impact Assessment
EA1N	East Anglia ONE North project
ES	Environmental Statement
EU	European
EMODnet	European Marine Observation and Data Network
GS	grey seal
HP	harbour porpoise
HS	harbour seal
Km	Kilometre
MUs	Management Units
NLOG	Netherlands Oil and Gas
SAC	Special Area of Conservation
SNS	Southern North Sea
UK	United Kingdom

## Glossary of Terminology

Construction operation and maintenance platform	A fixed offshore structure required for construction, operation, and maintenance personnel and activities.
East Anglia ONE North project	The proposed project consisting of up to 67 wind turbines, up to four offshore electrical platforms, up to one construction operation and maintenance platform, inter-array cables, platform link cables, up to one operational meteorological mast, up to two offshore export cables, fibre optic cables, landfall infrastructure, onshore cables and ducts, onshore substation, and National Grid infrastructure.
East Anglia ONE North windfarm site	The offshore area within which wind turbines and offshore platforms will be located.
Evidence Plan Process	A voluntary consultation process with specialist stakeholders to agree the approach to the EIA and the information required to support HRA.
Inter-array cables	Offshore cables which link the wind turbines to each other and the offshore electrical platforms, these cables will include fibre optic cables.
Marine Mammal Study Area	The area of which the site-specific survey for marine mammals (and seabirds) covered. This is the East Anglia ONE North windfarm site plus a 4km buffer area.
Mitigation areas	Areas captured within the Development Area specifically for mitigating expected or anticipated impacts.
Offshore development area	The East Anglia ONE North windfarm site and offshore cable corridor (up to Mean High Water Springs).
Offshore electrical infrastructure	The transmission assets required to export generated electricity to shore. This includes inter-array cables from the wind turbines to the offshore electrical platforms, offshore electrical platforms, platform link cables and export cables from the offshore electrical platforms to the landfall.
Offshore electrical platform	A fixed structure located within the windfarm area, containing electrical equipment to aggregate the power from the wind turbines and convert it into a more suitable form for export to shore.
Offshore export cables	The cables which would bring electricity from the offshore electrical platforms to the landfall, these cables will include fibre optic cables.
Offshore infrastructure	All of the offshore infrastructure including wind turbines, platforms, and cables.
Offshore platform	A collective term for the offshore operation and maintenance platform and the offshore electrical platforms.
Platform link cable	Electrical cable which links one or more offshore platforms, these cables will include fibre optic cables.

## 11.3 Marine Mammal Cumulative Impact Assessment (CIA) Screening

### 11.3.1 Introduction

1. The Tables in this Appendix summarise the results of the Cumulative Impact Assessment (CIA) screening and outlines the plans and projects which have been screened into the marine mammals CIA. Parameters for inclusion of plans and projects were:
  - a) Projects and plans within the agreed reference population boundary for the given receptor (see **section 11.5** of **Chapter 11 Marine Mammals**).
  - b) Projects and plans with the potential to cause the type of impact which could have a cumulative impact with the proposed East Anglia ONE North project (of **Chapter 11 Marine Mammals**).
  - c) Projects and plans from an assessment tier which was screened into the assessment.
2. For this assessment, the tiers used for assessment are based on guidance issued by JNCC and Natural England in September 2013, and are as follows:
  - Tier 1: built and operational projects;
  - Tier 2: projects under construction;
  - Tier 3: projects that have been consented (but construction has not yet commenced);
  - Tier 4: projects that have an application submitted to the appropriate regulatory body that have not yet been determined;
  - Tier 5: projects that the regulatory body are expecting to be submitted for determination (e.g. projects listed under the Planning Inspectorate programme of projects); and
  - Tier 6: projects that have been identified in relevant strategic plans or programmes.
3. These tiers are used as they are more appropriate to use compared to the tiers in The Planning Inspectorate (2015) Advice Note 17 for the types of projects and plans considered in this assessment, in particular for the offshore windfarm stages.
4. The screening results are provided for each type of plan or project including other offshore wind farms, other renewable developments, aggregate extraction and

dredging, licensed disposal sites, navigation and shipping, planned construction of subsea cables and pipelines and oil and gas installations (including surveying).

5. Any plans or projects that have the potential to result in a cumulative impact that commenced construction/commissioning between the end of the baseline and submission of the Environmental Statement (ES) will not be taken forward in the CIA for this type of cumulative impact. It is assumed that construction or commissioning will be completed before the start of construction of the proposed East Anglia ONE North project.
6. The first stage of the screening is based on the widest possible range of construction dates for the proposed East Anglia ONE North project between 2020 and 2029, based on consent in 2020, seven year construction window from date of consent and an offshore construction period of approximately 27 months. This is then refined to take into account planned construction between 2022 and 2027 under construction scenario 1 (East Anglia TWO and East Anglia ONE North being constructed at the same time) and between 2026 and 2028 under construction scenario 2 (East Anglia TWO and East Anglia ONE North being constructed sequentially).
7. There will not be any concurrent piling for the construction of East Anglia ONE North, or between East Anglia ONE North and East Anglia TWO.

#### 11.3.1.1 Data Sources

8. A wide range of data sources and information was used for the CIA and CIA screening, including, but not limited to:
  - Project ESs (and Preliminary Environment Information Report (PEIR));
  - Developer websites;
  - 4C Offshore Winds Database (<http://www.4coffshore.com/offshorewind/>);
  - Renewable UK website (<http://www.renewableuk.com>);
  - Crown Estate website;
  - Oil and gas UK licensing rounds website (<https://www.gov.uk/guidance/oil-and-gas-licensing-rounds#past-licensing-rounds>);
  - Cefas website (e.g. <http://data.cefas.co.uk/#/View/407>);
  - Planning Inspectorate National Infrastructure Planning website;
  - European Marine Observation and Data Network (EMODnet) data;
  - Netherlands Oil and Gas (NLOG) website;
  - Danish Energy Agency website;
  - Norwegian Petroleum Directive website; and

- Dutch Ministry of Infrastructure and the Environment – Rijkswaterstaat website.

### 11.3.2 Offshore Windfarms

9. Annex 1 lists all the United Kingdom (UK) and European (EU) offshore wind farm projects considered in the CIA screening categorised in tiers 1-5.

#### 11.3.2.1 UK Offshore Windfarms

10. UK based projects (**Table A11.3.1**) listed in tiers 1-5 were considered for potential construction, operation and maintenance, and decommissioning cumulative impacts, where those phases could overlap with the proposed construction, operation and maintenance, and decommissioning of the proposed East Anglia ONE North project and sufficient information and certainty in project programmes allowed for a meaningful assessment.
11. As a precautionary approach and to allow for potential delays and changes in schedule, the initial stage of the screening determined the potential for overlap with the estimated construction period of the proposed East Anglia ONE North project. For all UK consented (tier 3) projects this was based on a seven year window from date of consent in which construction could occur (although most projects have a five year consent window), or the known construction period for that project. For UK tier 4 projects (application submitted) the possible construction windows were based on the best available information.
12. As a more realistic approach, the second stage of the screening was to determine which currently consented (tier 3) UK offshore windfarm developments could be piling at the same time as the proposed East Anglia ONE North project, based on best available information on when the developments are likely to be constructing and piling. This scenario more accurately reflects the limitations and constraints to project delivery and is used in the CIA (see **Section 11.7 of Chapter 11 Marine Mammals**).
13. The initial screening resulted in a list of 48 UK offshore wind farms with the potential for construction, operation and decommissioning cumulative impacts on harbour porpoise. Of the 48 projects, 21 have the potential for construction to overlap with the proposed construction of the proposed East Anglia ONE North project.
14. Operational wind farms were considered part of the baseline if they were operational at the time of site specific surveys (September 2016). Therefore, 32 offshore wind farms currently classed as tier 2-5, were screened in for the potential for operation and maintenance to overlap with the construction, operation and maintenance or decommissioning of the proposed East Anglia ONE North project.

15. All 48 projects have the potential for decommissioning to overlap with the operation and maintenance or decommissioning of the proposed East Anglia ONE North project, and therefore have the potential for cumulative impacts for harbour porpoise.
16. For grey seal, 35 projects have been screened in, with the potential of construction cumulative impacts for 14 projects; operation and maintenance cumulative impacts for 20 tier 2-5 projects; and decommissioning cumulative impacts for all 35 projects.
17. For harbour seal, 31 projects were screened in, with 12 projects having the potential of construction cumulative impacts; 17 tier 2-5 projects with potential operations and maintenance cumulative impacts; and all 31 with possible decommissioning cumulative impacts. The results of the initial stage of the screening, based on seven year construction window from date of consent are presented in **Table A11.3.1**.

**Table A11.3.1 Results of the Initial CIA Screening for UK Offshore Windfarm Projects: List of UK Offshore Windfarms (Status at Time of Writing) within the Harbour Porpoise (HP), Harbour Seal (HS) and Grey Seal (GS) Management Units (MUs) and the HP Southern North Sea (SNS) Special Area of Conservation (SAC) with Potential to Overlap with the Proposed East Anglia ONE North Project (EA1N) Construction, Operation or Decommissioning Phases**

#### 11.3.2.2 European Offshore Windfarms

18. European projects (**Table A11.3.2**) listed in tier 1-3 were considered for the CIA. The screening for the construction of the European offshore wind farm tier 3 projects was based on the seven year window in which construction could occur (e.g. from date of consent for tier 3 projects in 2018 or later). If there was no information or any uncertainty, the projects were initially screened in as a precautionary approach.
19. The screening resulted in a list of 68 European offshore wind farms with the potential for construction, operation and decommissioning cumulative impacts on harbour porpoise. Of the 68 projects, 15 have the potential for construction to overlap with the proposed construction of the proposed East Anglia ONE North project; 37 projects have the potential for operation and maintenance to overlap with the construction, operation and maintenance or decommissioning of the proposed East Anglia ONE North project; and all projects have the potential for decommissioning to overlap with the operation and maintenance or decommissioning of the proposed East Anglia ONE North project, and therefore have potential of cumulative impacts for harbour porpoise.
20. For grey seal, four projects have been screened in, with the potential of construction cumulative impacts for one of the projects; operation and maintenance cumulative impacts for three projects; and decommissioning cumulative impacts for all four projects.
21. For harbour seal, four projects were screened in, one of which has the potential of construction cumulative impacts; three with potential operations and maintenance cumulative impacts; and all four with possible decommissioning cumulative impacts. The results of the screening are presented in **Table A11.3.2**.

**Table A11.3.2 Results of the Initial CIA Screening for European Offshore Windfarm Projects: List of EU Offshore Windfarms (Status at Time of Writing) within the HP, HS and GS MUs and with Potential to Overlap with the Proposed East Anglia ONE North Project Construction, Operation or Decommissioning Phases.**

### 11.3.3 Other Marine Renewable Developments

22. Other marine renewable projects (e.g. wave and tidal) assessed in the CIA screening were tier 1-5 for UK based projects, and tier 1-3 for other European projects. **Annex 2** Initial List of UK Wave and Tidal Projects Considered Within the CIA Screening lists all the other marine renewable projects considered in the CIA screening.
23. UK based projects listed in tiers 1-4 were screened in for potential cumulative impacts during construction, operation and maintenance and decommissioning, if those phases could overlap with the proposed construction, operation and maintenance, and decommissioning of the proposed East Anglia ONE North project and sufficient information was available to determine this. No European projects have been screened in (tier 3 or above). The results of the screening are in **Table A11.3.3**.
24. A total of 25 projects were initially screened into the harbour porpoise CIA, none of which have the potential for construction to overlap with the proposed construction of the proposed East Anglia ONE North project and 18 have the potential for operational cumulative impacts.
25. No marine renewable projects were screened into the CIA for grey seal or harbour seal.
26. Piling is highly unlikely to be used during the installation of the marine renewable projects. The installation of wave/tidal projects is typically using drilled pins or gravity bases. Percussive piling is not anticipated to be used as an installation method and therefore the noise impacts during construction will have a very limited impact range, especially compared to offshore wind farms.
27. The installation of wave or tidal developments is highly unlikely to contribute to the cumulative impacts of the disturbance of harbour porpoise from underwater noise sources.
28. Similarly, the operation and maintenance of wave and tidal projects are also highly unlikely to contribute to the cumulative impacts of the disturbance of harbour porpoise from underwater noise sources and therefore have not been included in the CIA.
29. Wave and tidal arrays can pose a potential collision risk for marine mammals. The likelihood for collision may depend on many variables such as species, underwater visibility, detectability of the devices, the size and type of devices, the location, water depth and the rotation speed of the rotor blades. However, if there is the potential for significant collision risk for marine mammals then the wave or tidal development would be required to implement suitable mitigation to reduce the risk and any potential significant effects at the population level. Therefore,

there should be no potential for any significant cumulative impacts and as a result this has not been included in the CIA.

**Table A11.3.3 Results of Initial CIA Screening for Marine Renewable Projects: List of UK Projects (Status at Time of Writing) within the HP, HS and GS MUs and the HP SNS SAC with Potential to Overlap with the Proposed East Anglia ONE North Project Construction, Operation or Decommissioning**

#### 11.3.4 Aggregate Extraction and Dredging (Operational Impacts Only)

30. Aggregate extraction and dredging projects considered for the CIA screening were tier 1-3 for UK based projects (**Table A11.3.4**); no European projects were screened in due to a lack of information.
31. No projects were identified in tier 2 or 3, and all of the tier 1 projects identified by screening were already active dredge zones, and are therefore considered part of the baseline. Therefore, the 52 aggregate extractions and dredging projects were screened out from further consideration in the CIA for marine mammals during the proposed construction, operation and maintenance and decommissioning of the proposed East Anglia ONE North project.

#### 11.3.5 Offshore Mining

32. Offshore mining projects considered for the CIA screening were tier 1-3 for UK based projects (**Table A11.3.5**); no European projects were considered due to a lack of information.
33. Two UK mining projects were identified, one under construction and one operational, both projects were within the MU areas for harbour porpoise and grey seal.
34. The operational project is considered part of the current baseline and therefore not considered further in the CIA.
35. The other project is unlikely to contribute significantly to underwater noise and therefore any potential disturbance as any construction will be on land or under the seabed, based on currently available information, and therefore not considered further in the CIA.

**Table A11.3.4 Results of Initial CIA Screening for Aggregate Extraction and Dredging Projects: List of UK Projects (Active Status at Time of Writing) within the HP, HS and GS MUs and the HP SNS SAC with Potential to Overlap with the proposed East Anglia ONE North Projects Construction, Operation or Decommissioning Phases.**

### 11.3.6 Oil and Gas Installations and Activities

36. Oil and gas exploration and installations could have the potential for cumulative impacts during the construction, operation and maintenance, and decommissioning of the proposed East Anglia ONE North project. Plans or projects considered during the CIA screening were tier 1-3 for UK based projects; no European projects are assessed in due to a lack of information.
37. All tier 1 projects considered in CIA screening were actively producing at the end of the baseline, and are therefore not considered for construction, operational and maintenance cumulative impacts. There is a large amount of uncertainty around decommissioning, and although there are a number of fields where production has ceased, no assumptions have been made about any decommissioning activities. Therefore, this phase of oil and gas projects has been screened out of the CIA.
38. Oil and gas activities considered in the CIA screening are tier 2 and 3 projects based on the 28th supplementary, 29th and 30th Round of Offers (see <https://www.gov.uk/oil-and-gas-licensing-rounds#past-licensing-rounds> for more detail). Confirming which of the Licence block or part blocks from these rounds are in which period of the Licence or whether exploration or extraction may be occurring is outwith the scope of this CIA. There is the potential that each of these plans or projects could be either in commissioning or exploration or operational phase during the lifespan of the proposed East Anglia ONE North project.
39. A number of Licence blocks west of Shetland were also identified during screening, some of these blocks are on the boundary of the harbour porpoise North Sea MU and have been screened out of the assessment due to the large spatial separation between the East Anglia ONE North offshore development area and the location of these blocks.
40. **Table A11.3.6** lists the Licence blocks or part blocks (plans or projects) which have been identified in the CIA screening. A total of 393 licences have been granted for the licence blocks or part blocks within the MU for harbour porpoise, 142 in the MU for grey seal and 83 in the MU for harbour seal. However, there is currently no information on if or when these blocks will or could be developed. Therefore, it is not currently possible to include them in the CIA, other than the potential seismic surveys that could be undertaken.
41. Operational activity of oil and gas projects in currently developed blocks are considered part of the baseline and are therefore not included in the CIA.

**Table A11.3.6 Results of Initial CIA Screening for Oil and Gas Exploration and Installations Projects: List of UK projects (status at time of writing) within the HP, HS and GS MUs and the HP SNS SAC with potential to overlap with the proposed East Anglia ONE North Project Construction, Operation or Decommissioning Phases.**

### 11.3.7 Navigation and Shipping (Operational Impacts Only)

42. Navigational and shipping projects considered in the CIA screening were tier 1-3 for UK based projects. All European projects were screened out. Projects were considered for potential operational impacts if the plan or project had not started by the end of the proposed East Anglia ONE North project baseline.
43. No projects were identified in tier 2 or 3, and all of the tier 1 projects identified by screening were already active, and are therefore considered part of the baseline.
44. Therefore, all navigation and shipping operations have been screened out of the CIA.

### 11.3.8 Subsea Cables and Pipelines (Commissioning and Construction Impacts Only)

45. Subsea cables and pipelines only have the potential for cumulative impacts with the proposed East Anglia ONE North project during their construction. Plans or projects considered for the CIA screening were tier 1- 5 projects, where relevant.
46. All of the tier 1 projects identified during screening were already installed, and are therefore considered part of the baseline.
47. For harbour porpoise, 14 tier 2 projects were identified, and in addition, one tier 3 project, four tier 4 projects, and 18 tier 5 projects were also included in the CIA. For grey seal, 14 tier 2 projects and an additional one tier 3, two tier 4 and 14 tier 5 projects were included in the CIA. For harbour seal, 13 tier 2 projects, two tier 4 and 11 tier 5 projects were included in the CIA.
48. The underwater noise that could be generated during the seabed preparation, ploughing / jetting / pre-trenching or cutting for installation of cables / pipelines, rock dumping for protection of the cable / pipelines, and installation vessels, would be restricted to the area of installation and temporary (as indicated in **section 11.6.1.5 of Chapter 11 Marine Mammals**).
49. Therefore, taking into account the distances from East Anglia ONE North, the potential for any cumulative impacts is negligible and has not been included in the CIA.

**Table A11.3.7 Results of CIA Screening for Subsea Cables and Pipelines: List of Projects (Status at Time of Writing) within the HP, HS and GS MUs and the HP SNS SAC with Potential to Overlap with the East Anglia ONE North Construction, Operation or Decommissioning Phases.**

Project	Landfall Locations	Type Cable or Pipeline	Tier	Spatial Area Screened in for						Screened in for further assessment

### 11.3.9 Carbon Capture Projects

50. Carbon capture projects considered in the CIA screening were tier 1-3 for UK based projects. All European projects were screened out.
51. No projects were identified in tier 2 or 3, and all of the tier 1 projects identified by screening were already active, and are therefore considered part of the baseline. Tier 4 and 5 projects were screened out, including the Endurance and Goldeneye projects as both are tier 5. Therefore, all carbon capture projects have been screened out of the CIA.

### 11.3.10 Summary of Projects Screened in for Assessment

52. **Table A11.3.8** summaries the results of the CIA screening process.

**Table A11.3.8 Number of Plans or Project from Each Category which have been Screened into the CIA for Each Receptor and the Stage of the Plan or Project where a Cumulative Impact may Occur (C = Commissioning / Construction O = Operation, D = Decommissioning, N/A = Not Assessed as there is no Pathway)**

Project Category	Screened in for harbour porpoise			Screened in for grey seal			Screened in for harbour seal		
	C	O	D	C	O	D	C	O	D
UK Offshore Windfarms	21	32	48	14	20	35	12	17	31
European Offshore Windfarms	15	37	68	1	3	4	1	3	4
Wave and Tidal Projects	0	18	25	0	0	0	0	0	0

## Annex 1 Initial List of UK and Other European Offshore Windfarms Considered Within the CIA Screening

## Annex 2 Initial List of UK Wave and Tidal Projects Considered Within the CIA Screening

Project	Type	Status	Tier	In the MU / reference population area for harbour porpoise (HP), grey seal (GS) and harbour seal (HS)		
				HP	GS	HS
Bardsey Sound	Tidal	In development	5	N	N	N
Benera	Wave	Cancelled	6	N	N	N
Billia Croo Development area	Wave	Operational	1	Y	N	N
Bluemell Sound	Tidal	Operational	1	Y	N	N
Brims tidal array Phase 1	Tidal	Cancelled	6	Y	N	N
Brims tidal array Phase 2	Tidal	Cancelled	6	Y	N	N
Brough Head (Aquamarine Power)	Wave	Cancelled	6	Y	N	N
Cardiff Tidal Lagoon	Tidal	In development	5	N	N	N
Costa Head	Wave	Cancelled	6	Y	N	N
Duddon Estuary Tidal Lagoon	Tidal	In development	5	N	N	N
EMEC - Aquamarine Power Phase 2	Wave	Inactive	0	Y	N	N
EMEC - Billia Croo	Wave	Operational	1	Y	N	N
EMEC Alstom	Tidal	Decommissioned	0	Y	N	N
EMEC Andritz Hydro Hammerfest	Tidal	Decommissioned	0	Y	N	N
EMEC Atlantis Resources AK1000	Wave	Decommissioned	0	Y	N	N
EMEC Atlantis Resources AR1000	Wave	Decommissioned	0	Y	N	N

Project	Type	Status	Tier	In the MU / reference population area for harbour porpoise (HP), grey seal (GS) and harbour seal (HS)		
				HP	GS	HS
EMEC Clean Energy From Ocean Waves (CEFOW) Phase 1	Wave	Consented	3	Y	N	N
EMEC Fall of Warness	Tidal	Decommissioned	0	Y	N	N
EMEC Flumill	Tidal	Decommissioned	0	Y	N	N
EMEC Harris Demo Zone	Wave	In development	5	N	N	N
EMEC Islay Demo Zone	Tidal	In development	5	N	N	N
EMEC Laminaria	Wave	Consented	3	Y	N	N
EMEC Magallanes	Tidal	Decommissioned	0	Y	N	N
EMEC Nautricity Phase 1	Tidal	Decommissioned	0	Y	N	N
EMEC Nautricity Phase 2	Tidal	Decommissioned	0	Y	N	N
EMEC OpenHydro	Tidal	Operational	1	Y	N	N
EMEC Pelamis Wave Power P1	Wave	Decommissioned	0	Y	N	N
EMEC Scapa Flow (CorPower Ocean)	Wave	Operational	1	Y	N	N
EMEC Scotrenewables SR2000	Tidal	Operational	1	Y	N	N
EMEC Scotrenewables SR250	Tidal	Decommissioned	0	Y	N	N
EMEC Seatricity	Wave	Operational	1	Y	N	N

Project	Type	Status	Tier	In the MU / reference population area for harbour porpoise (HP), grey seal (GS) and harbour seal (HS)		
				HP	GS	HS
EMEC Shapinsay Sound	Tidal	Operational	1	Y	N	N
EMEC Stronsay Firth	Tidal	In development	5	Y	N	N
EMEC Sustainable Marine Energy	Tidal	Construction	2	Y	N	N
EMEC Tocardo Phase 2	Tidal	Consented	3	Y	N	N
EMEC Tocardo Phase 1	Tidal	Decommissioned	0	Y	N	N
EMEC Voith Hydro	Tidal	Decommissioned	0	Y	N	N
EMEC Wello Oy	Wave	Operational	1	Y	N	N
EMEC Wello Oy 2	Wave	Construction	2	Y	N	N
Fabtest Fred Olsen	Wave	Decommissioned	0	N	N	N
Fabtest OWEL	Wave	Pre-construction	3	N	N	N
Fabtest Polygen	Wave	Operational	1	N	N	N
FabTest WaveSub	Wave	Construction	2	N	N	N
Fair Head Phase 1 & 2	Tidal	In development	5	N	N	N
Farr Point	Wave	Cancelled	0	N	N	N
Galson	Wave	ON HOLD	3	N	N	N
Harris Demo Zone	Wave	In development	5	N	N	N
Holyhead Deep	Tidal	In development	5	N	N	N
Holyhead Deep Phase 1	Tidal	Operational	1	N	N	N
Humber Pulse Tidal	Tidal	Decommissioned	0	Y	Y	Y

Project	Type	Status	Tier	In the MU / reference population area for harbour porpoise (HP), grey seal (GS) and harbour seal (HS)		
				HP	GS	HS
Islay Demo Zone	Tidal	In development	5	N	N	N
Lashy Sound (1 & 2)	Tidal	In development	5	Y	N	N
Marwick Head	Wave	Cancelled	6	Y	N	N
MeyGen Pentland Firth Phase 1a	Tidal	Operational	1	Y	N	N
MeyGen Pentland Firth Phase 1b	Tidal	Consented	3	Y	N	N
MeyGen Pentland Firth Phase 1c	Tidal	Consented	3	Y	N	N
MeyGen Pentland Firth Phase 2	Tidal	In development	5	Y	N	N
Minesto Strangford Loch	Tidal	Operational	1	N	N	N
Morecambe Bay Tidal Lagoon	Tidal	In development	5	N	N	N
Morlais	Tidal	In development	5	N	N	N
Mull of Galloway	Tidal	In development	5	N	N	N
Mull of Kintyre Phase 1	Tidal	Pre-construction	3	N	N	N
Mull of Kintyre Phase 2	Tidal	In development	5	N	N	N
mWave	Wave	In development	5	N	N	N
Ness of Duncansby Phase 1 & 2	Tidal	Pre-Scoping	5	Y	N	N
North Cornwall Demo Zone	Wave	In development	5	N	N	N
North Devon Demo Zone	Tidal	In development	5	N	N	N

Project	Type	Status	Tier	In the MU / reference population area for harbour porpoise (HP), grey seal (GS) and harbour seal (HS)		
				HP	GS	HS
North Yell	Tidal	Operational	1	Y	N	N
North-West Lewis	Wave	Cancelled	6	N	N	N
Pendeen Array	Wave	In development	5	N	N	N
Perpetuus Tidal Energy Centre (PTEC)	Tidal	Consented	3	Y	N	N
PLAT-1 Floating Tidal Energy	Tidal	Construction	2	N	N	N
Pontnahaven	Wave	Decommissioned	0	N	N	N
Portland Bill Tidal Site	Tidal	In development	5	Y	N	N
Ramsey Sound	Tidal	Decommissioned	0	N	N	N
Sanda Sound	Tidal	Decommissioned	0	N	N	N
Scapa Flow	Tidal	Operational	1	Y	N	N
Scilly Airport WEP	Wave	Cancelled	6	N	N	N
Seagen Anglessey Skerries	Tidal	Cancelled	6	N	N	N
Seagen Brough Ness	Tidal	In development	5	Y	N	N
Seagen Kyle Rhea	Tidal	Cancelled	6	N	N	N
Seagen Stragford Loch	Tidal	Operational	1	N	N	N
Seagen Stragford Loch Array	Tidal	In development	5	N	N	N
Shetland Tidal Array Phase 1	Tidal	Operational	1	Y	N	N
Shetland Tidal Array Phase 2	Tidal	Consented	3	Y	N	N

Project	Type	Status	Tier	In the MU / reference population area for harbour porpoise (HP), grey seal (GS) and harbour seal (HS)		
				HP	GS	HS
Solway Energy Gateway	Tidal	In development	5	N	N	N
Sound of Islay	Tidal	Pre-construction	3	N	N	N
South Pembrokeshire Demo Zone	Wave	In development	5	N	N	N
St Davids Head	Tidal	In development	5	N	N	N
Stronsay Firth	Tidal	In development	5	Y	N	N
Swansea Bay Tidal Lagoon	Tidal	Pre-construction	3	N	N	N
Torr Head	Tidal	Consented	3	N	N	N
Wave Hub (Carnegie)	Wave	Consented	3	N	N	N
Wave Hub (CETO 6 Phase 1)	Wave	Consented	3	N	N	N
Wave Hub (CETO 6 Phase 2)	Wave	Consented	3	N	N	N
Wave Hub (Fortum)	Wave	In development	5	N	N	N
Wave Hub (GWave)	Wave	Consented	3	N	N	N
Wave Hub (Seatricity 1)	Wave	Operational	1	N	N	N
Wave Hub (Seatricity 2)	Wave	In development	3	N	N	N
Wave Hub (Simply Blue)	Wave	In development	5	N	N	N
Wave Net Array	Wave	Operational	1	N	N	N
West Islay Tidal Energy Park	Tidal	Consented	3	N	N	N

Project	Type	Status	Tier	In the MU / reference population area for harbour porpoise (HP), grey seal (GS) and harbour seal (HS)		
				HP	GS	HS
West Orkney Middle South Phase 1 & 2	Wave	Cancelled	6	Y	N	N
West Orkney South	Wave	Cancelled	6	Y	N	N
West Somerset Tidal Lagoon	Tidal	In development	5	N	N	N
Westray South	Tidal	Application in prep	5	Y	N	N
Wyre Estuary Tidal Barrage	Tidal	In development	5	N	N	N
