Application for the Inclusion of Additional Land

Through engagement with the Project's design teams and various stakeholders, the Applicant has continued to progress and refine the design of the Project since submission of the Application. This process has identified a number of areas where refinements to the Project could serve to reduce the environmental impact of the Project. However, for some of the refinements the inclusion of additional land in the Application is required. A number of other refinements have been made to the Project which do not require additional land, and details of these non-material amendments are provided within the Notice of Intent to Make Non-Material or Material Changes submitted at Deadline 1.

With respect to the proposed refinements that require the inclusion of additional land, an Application for the Inclusion of Additional Land has been submitted at Deadline 1 which sets out full details of the proposed changes. This document has been prepared in the context of section 123 of the Planning Act 2008 and Regulation 4 of the Infrastructure Planning (Compulsory Acquisition) Regulations 2010 (the Compulsory Acquisition Regulations). In accordance with Regulation 5 of the Compulsory Acquisition Regulations, the following documents have been submitted to support the Applicant's request to include additional land within the Application:
