The Application relates to the construction, operation and maintenance of the Norfolk Vanguard Offshore Wind Farm, with an electrical export capacity of up to 1,800MW and comprising up to 200 wind turbine generators and associated infrastructure, to be located approximately 47km offshore (at the closest point) (the **Project**). The DCO for the Project would, amongst other things, also authorise:

- 1Up to two accommodation platforms and associated foundations;
- 2Up to two meteorological masts and associated foundations;
- 3Up to two LIDAR measurement buoys and up to two wave measurement buoys;
- 4Up to two offshore electrical platforms and associated foundations;
- 5Subsea array cables and fibre optic cables, including offshore cable crossings, between the wind turbine generators and offshore electrical platforms;

- 6Up to four subsea export cables and fibre optic cables to transmit electricity from the offshore electrical platforms to shore;
- 7Scour protection around foundations and on array cables and export cables as required;
- 8Landfall at Happisburgh South with up to two transition jointing pits to join the offshore and onshore cables;
- 9Onshore transmission works consisting of up to four cables to be laid in ducts and up to four additional cable ducts for the Norfolk Boreas Offshore Wind Farm, and associated fibre optic cables laid underground within cable ducts, running from landfall at Happisburgh South to the onshore project substation;
- 10An onshore project substation to the east of the existing National Grid substation at Necton, Norfolk, to connect the onshore transmission works to the National Grid substation, together with surface water management, bunding, embankments, and boundary treatments at the onshore project substation site;
- 11Up to 12 400kV underground interface cables between the onshore project substation and the existing Necton National Grid Substation, and an extension to the Necton National Grid substation;
- 12Modification of the existing overhead line network in the vicinity of the existing Necton National Grid substation including the removal of one existing pylon and construction of two new permanent pylons and the installation of conductors, insulators, and fittings on the pylons;
- 13Permanent access connecting the A47 to the onshore project substation and the existing Necton National Grid substation;
- 14Temporary construction areas, working sites and mobilisation areas and access roads in connection with the cable route and onshore project substation and the existing Necton National Grid substation;
- 15Jointing pits, manholes, kiosks, marker posts, link boxes and other works associated with laying ducts and/or cables and fibre optic cables and/or pulling cables through cable ducts;
- 16The permanent and/or temporary compulsory acquisition (if required) of land and/or rights for the proposed Project;
- 17Overriding of easements and other rights over or affecting land for the proposed Project;
- 18The application and/or disapplication of legislation relevant to the proposed Project including inter alia legislation relating to compulsory purchase; and
- 19Such ancillary, incidental and consequential provisions, permits or consents as are necessary and/or convenient.

The proposed works are environmental impact assessment (EIA) development for the purposes of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 and accordingly an Environmental Statement accompanied the Application.
