KJ, Kay

Anticipating the Examining Authority may wish to undertake an unaccompanied site visit for the onshore works, we have prepared the attached plan and handful of supporting notes. The purpose of the plan (which uses the same datasets as that submitted with the application) is to assist in identifying points along the onshore export cable corridor that are accessible from the public highway/public rights or way.

Supporting these plans, a few observations for key locations to assist in your navigation. I also note that along the cable corridor phone coverage can be limited.

Location	Notes
Landfall (Page 2 on the attached plans)	Accessible via the public beach, with parking available at Weybourne Beach car park.
Onshore HVAC Booster Station (Page 3)	The Onshore HVAC Booster Station is located on private land. There is a PRow / Bridleway running north/south from which limited views can be obtained. Parking is limited to the road verge.
Main Construction Compound (Page 4)	The Main Construction Compound is located on private land. The airfield can be viewed from a distance via various points along "Oulton Street".
Norfolk Vanguard/Hornsea Project Three Crossing, Reepham (Page 4)	A view of the crossing point can be seen from the Marriott's Way and FP18 runs directly through the point of cross over.
HVDC Converter/HVAC Substation (Page 7)	The Onshore HVDC Converter/HVAC Substation is located on private land, however, you can access a layby off the B1113 which provides for good views across the site. Other viewpoints can be achieved along Mangreen Lane and from the A47 (although we do not advise that vehicles stop on the A47).

Best regards,
Andrew Guyton
