Executive Summary

National Grid in its role as EMR Delivery Body is required by the Capacity Market Rules 2014 (Rule 5.10.2) to notify the Secretary of State of the Provisional Results of the Capacity Market Auction as soon as reasonably practicable following the conclusion of the Capacity Auction. This report discharges that obligation.

The T-1 Capacity Auction for delivery in 2018/19 concluded **on 1st February 2018, 15:00 GMT**. The results of the auction are as follows, where any capacity figure refers to de-rated capacity, unless otherwise stated.

The Clearing Price is: **£6.00 per kW per year**.

The Aggregate Capacity of Capacity Market Units awarded Capacity Agreements is: **5,782.892 MW**.

The CMUs to which a Capacity Agreement has been provisionally awarded and the duration of those Capacity Agreements are listed in Appendix A.

In addition to the results presented above, National Grid is required under Capacity Market Rule 5.10.3 to report any CMUs that were removed from the IT Auction System under Capacity Market Rule 5.3.3. **The Auction concluded without any CMUs being removed from the system by National Grid.**

The remainder of this report gives further detail on the Capacity Market Auction Clearing, how the Clearing Price was reached and what makes up the capacity that has been procured.

The results of the auction remain provisional for the period of 8 working days after the completion of the Capacity Market Auction, during which time the Secretary of State may annul the auction on the grounds specified in Regulation 27 of the Electricity Capacity Regulations 2014. Final results will be published once this period has elapsed.

Any T-4 (delivery year 2018/19) data shown within this document originates from the latest Capacity Market Register available at the time this document was published.

The Auction Clearing Price

The Clearing Price is: **£6.00 per kW per year**.

The 2017 T-1 Auction Cleared in **Bidding Round 14** on the **1st February 2018, 15:00 GMT**.

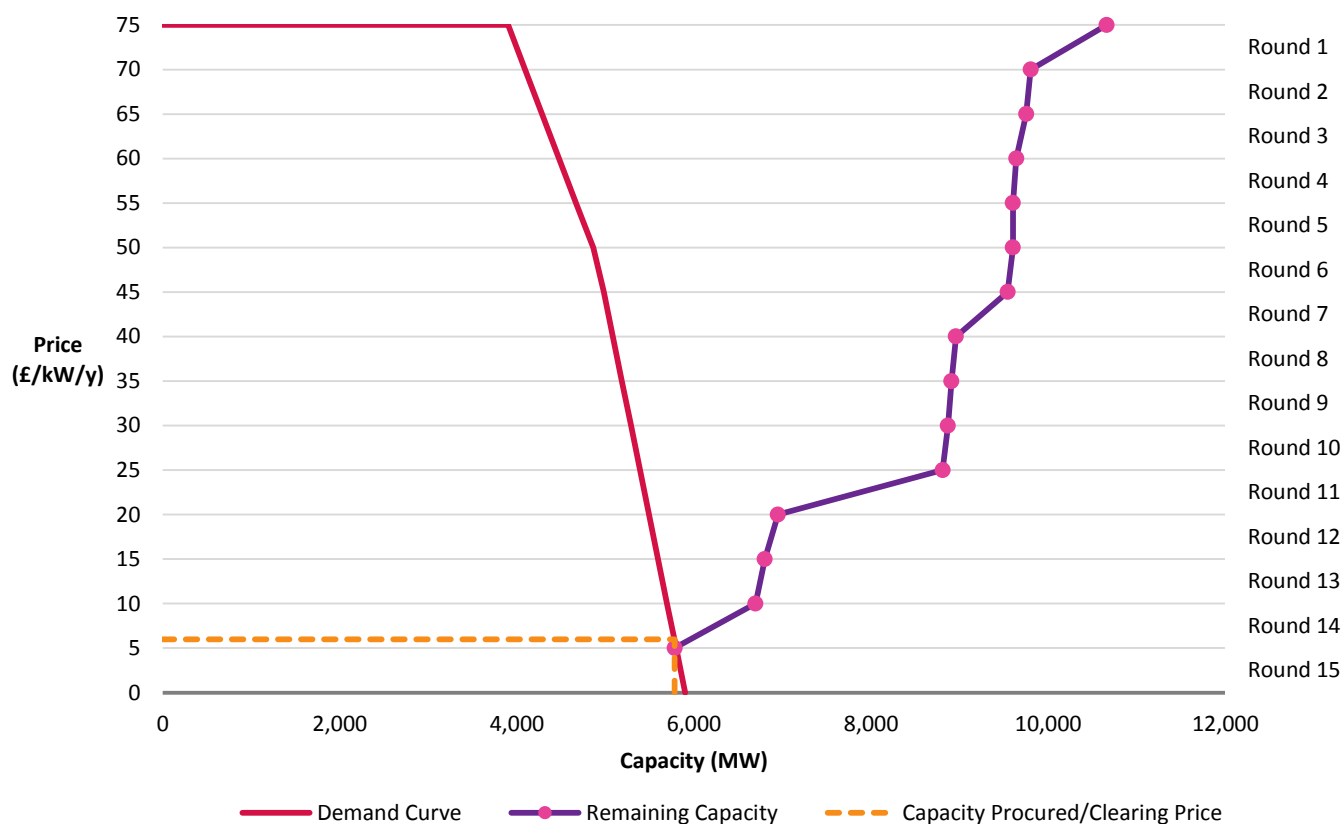

The Auction did not clear with an exact match of Offered Capacity and target capacity ("Clearing Capacity") and so the Net Welfare Algorithm was used to determine price and volume.

The Net Welfare Algorithm evaluates the integral specified in Rule 5.9.6 to determine whether to include the marginal unit. The algorithm subtracts the additional cost of procuring the marginal unit from the welfare gained by procuring the marginal unit. If the result is positive i.e. the welfare gained by procuring the additional unit outweighs the cost, the unit is included, and the Clearing Price is set to the Exit Bid Price of that unit.

The result of the Net Welfare Algorithm was positive and the marginal unit has been procured.

Figure 1 shows the Demand Curve and the supply curve. The supply curve is found by cumulatively adding the Bidding Capacities of CMUs, according to their Exit Ranking. The supply curve meets the Demand Curve at a Price of £6.00 per kW per year.

The Aggregate Bidding Capacity of CMUs Provisionally Awarded Agreements

The Aggregate Bidding Capacity of CMUs provisionally awarded Capacity Agreements is: **5,782.892 MW**.
A total of **10,663.717 MW** entered the Auction, of which **54.23%** received Capacity Agreements for delivery in 2018/19.

Figure 2: T-1 Breakdown of the Capacity Entering the Auction Provisionally Awarded Agreements

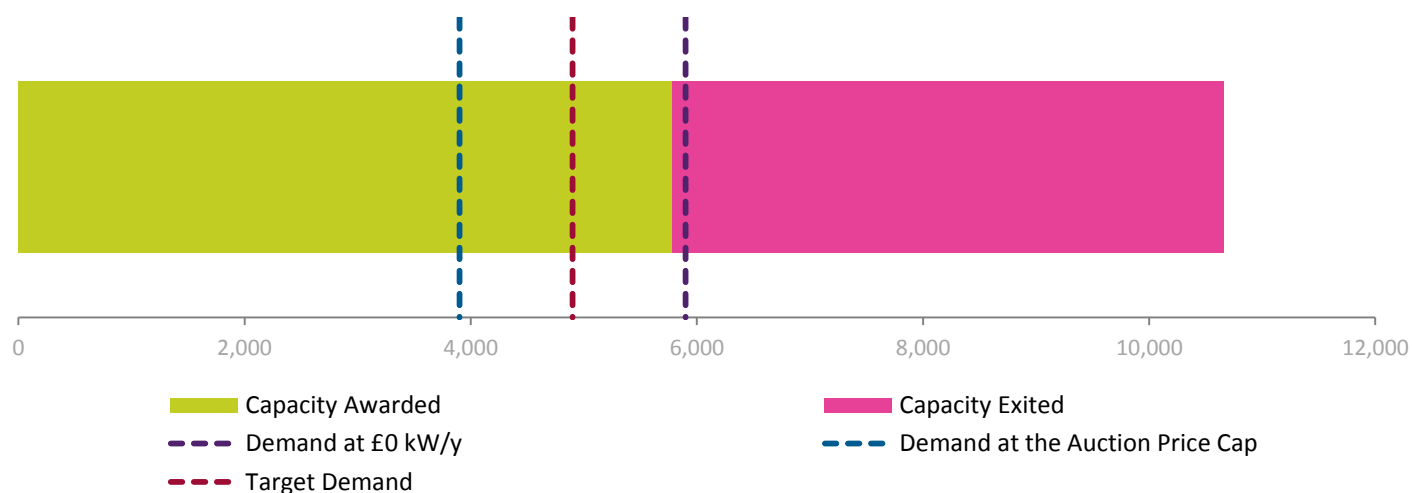

Figure 3 and Table 1 show the breakdown of the Total Awarded Capacity Agreements by CMU Type. A mixture of new and existing Capacity was procured of which **1,000.851 MW** is new capacity for T-1. This is the sum of the capacity of CMUs that have been awarded agreements that are Unproven DSR or New Build CMUs.

The CMUs to which Capacity Agreements have been Provisionally Awarded

A List of the CMUs and their provisional status has been included in Appendix A. In total there are **213 CMUs** that have been awarded Capacity Agreements, from **114 Applicant Companies**.

The Duration of Agreements Awarded

The maximum duration for Capacity Agreement received in the T-1 Auction is one year. The capacity procured for the period of 2017 to 2034 is shown in figure 5 below.
