

Norfolk Boreas Project:

Examining Authority's record of unaccompanied site inspections up to 16 March 2020.

## **Application by Norfolk Boreas Limited for an Order granting development consent for the Norfolk Boreas project (the Application)**

### **Examining Authority's record of unaccompanied site inspections to which the application or specified matters relate**

The Panel appointed as the Examining Authority for the Norfolk Boreas project undertook unaccompanied site inspections (USIs) as listed below.

The USIs were undertaken on foot and by car, on public roads and footpaths. Routes for visits were planned having regard to issues raised from relevant representations and other Examination submissions, enabling the Panel to obtain views of the proposals. Regard was also given to the verified viewpoints (VP) contained in the Environmental Statement (ES).

Where specific places not identifiable by name are referenced, the references are taken from the Policies and Designations drawings [APP-430] and the Public Rights of Way, cycle routes and long-distance trails maps [APP-535]. The reference number in format 'VP\*\*' has been provided for the VPs contained in the ES [APP-509] to [APP-532], and in format 'CH\*' the Heritage settings assessment [APP-672]. Access points are identified (eg AC130) from the Access to Works Plans [APP-011].

This list of sites inspected will be updated as further USIs are undertaken by Panel members over the course of its examination of the Application.

<b>Date and Time</b>	<b>ESVP if applicable</b>	<b>Location</b>	<b>Weather</b>
30 September 2019 12:30pm – 1:00pm	VP10 CH5	Holme Hale, Church of St. Andrew, Holme Hale.	Sunny, clear, visibility good
