Dear Mr Green,

**Your ref: EN010093 - Application by Cory Riverside Energy
for an Order Granting Development Consent for the Riverside
Energy Park**

I was at yesterday's meeting held at Belvedere Community Centre. You said you would consider any late submissions, hence me writing to you. I am late coming to this issue and did not speak or make an earlier submission.

It was when Cory's legal representative said that Cory "took people's health seriously" that I questioned whether they do. It is an easy thing to say when profits are involved.

I live in [REDACTED] about one and three quarter miles from the existing incinerator and above it. When the wind is from the North or Northwest we can smell the emissions from the incinerator and on occasions 'smoke' can be seen coming from it's chimney. What pollutants and particulates are being put into the atmosphere and are these monitored by anybody other than Cory and do they publish these records?

The existing incinerator can also be heard and I would like to know how this noise will increase if there are two incinerators running.

It should also be noted that there are several schools in similar locations to my house ie close to and above the incinerator.

Thank you for your time.

Best wishes,
Cheryl Osborne.
