

Based on Sunnica's current track record of missing deadlines I object to the Examination starting now and agree with the ExA decision to delay the start of the Examination. There are too many unknowns at this stage to allow a fair Examination process and it is unlikely that these will be clarified any time soon. With an unclear proposal, constantly moving goal-posts and only partial disclosure of information to select parties (even their latest consultation on transport is only directed at a few people, rather than the residents that will be affected) it does not make sense to even entertain commencement of the examination. In my view Sunnica should retract their application, get their house in order and, should they then have a clear plan, resubmit their application. Stop wasting everyone's time! Furthermore with reference to food security this should definitely be taken into consideration. As I drive or cycle between Isleham, Worlington, Freckenham, West Row and Mildenhall I'm constantly reminded of the agricultural importance of this region. It's madness to think that Sunnica wish to replace the Wheat, Barley, Potatoes, Onions, Sugarbeet etc that are currently growing in the exact fields where they want to install Solar Panels. It's totally immoral and misguided and the impact on food security in today's climate needs to be considered.
