

The prospect of living with this horrific monstrosity is grim.

1. It's been proposed to be slap bang in the middle of beautiful rural Fenland.
2. It will damage wildlife
3. I don't like the idea of batteries being in the ground near me.
- 4 it's unsafe.
5. Potential fire risk.
6. Ruins farming land.
7. Will effect people's mental health.
8. Potential noise????
9. Devalue people's homes.
10. It's industrial, so build it in and industrial area not in the beautiful countryside
