

Presumably all on the Inquiry panel are aware of the "Lorry-Battery Fire that affected the M.11 on 22.01.23 and closed that major route for 2 days [48 hours] -- I don't know how to up-load the pictures from The Cambridge News -- but they would willingly provide it -- Please consider such a fire and the devastation/inhalation effects on the many people who DO live in close proximity to the many battery storage areas which are a large part of this dreadful proposal -- Dr E Fordham is right -- for this reason also it should not be permitted. T J Lawson
