Subject: Comments on application for a non-material change to The Sunnica Energy Farm Order 2024 (SI 2024/802)
Date: 11 January 2026 17:30:22

To whom it may concern,

Please accept my representation on the latest Sunnica application as referenced above.

I strongly object to this application and the entire development.

This latest application represents a material development change to the original plans and indicates flaws in the original planning.

It introduces more uncertainty as to what the actual scheme will look like if it does go ahead, and who knows what other changes might be submitted in the meantime.

Regards,

Kieran Coffey , (local resident impacted by the scheme).
