Dear Planning Inspectorate

Date: 15.1. 2026

My Unique Number [REDACTED]

My Response to the invitation for interested parties to make further comments are as follows:

Sunnica Ltd has throughout the process of planning and since the plan has been 'passed' made many changes to their plans, which brings into question their ability to stick to any plan.

The reason this 'plan' was passed - against the recommendation of the examiners - was to help with clean power, power security and carbon net zero. But no consideration seemed to be given to **food security** and the **extra carbon** it will take to import the food that would otherwise have been grown on the land that the solar panels will destroy.

Why are Sunnica Ltd being allowed to change their plans after the deadline, when the **General Public** are no longer able to comment, research or object to the changes.

Brenda Knowles
