Glossary of terms

TERM	DEFINITION
Development Consent Order (DCO)	An order made under the Planning Act 2008 granting development consent for a Nationally Significant Infrastructure Project (NSIP) from the Secretary of State (SoS).
Effect	Term used to express the consequence of an impact. The significance of an effect is determined by correlating the magnitude of the impact in question with the sensitivity of the receptor in question, in accordance with defined significance criteria.
Impact	An impact to the receiving environment is defined as any change to its baseline condition, either adverse or beneficial, resulting from the activities associated with the construction, operation and maintenance, or decommissioning of the project.
Mitigation	Mitigation measures are commitments made by the project to reduce and/or eliminate the potential for significant effects to arise as a result of the project. Mitigation measures can be embedded (part of the project design) or secondarily added to reduce impacts in the case of potentially significant effects.

1 Introduction

- 1 This Book of Reference accompanies the proposed Development Consent Order ("the Order") for the Awel y Môr Offshore Wind Farm ("the authorised development"), as required by Regulation 5(2)(d) of the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009 ("the Regulations").
- 2 The land described in this Book of Reference, which is to be subject to powers of compulsory acquisition and/or temporary possession, is required to deliver the works comprising the authorised development which are described in detail in Part 1 of Schedule 1 of the Order and shown on the works plans. This Book of Reference is part of the application documents for the authorised development it should be read in conjunction with the Land Plans (Document references 2.2, 2.3, 2.4 and 2.10), the Statement of Reasons (Document reference 4.1) and the draft DCO (Document reference 3.1).
- 3 Every parcel of land that is affected is identified on a plot by plot basis and a unique number has been ascribed to each plot. The plots are shown on the Land Plans which accompany the Order. For each plot it identifies whether the Applicant (Awel y Môr Offshore Wind Farm Limited or the undertaker) is seeking the power to acquire that plot outright, the power to create and/or acquire permanent rights, or the power to create and/or acquire temporary rights of possession and use. It also lists the persons with land outside the order limits who may be entitled to make a relevant claim for compensation due to the effects of construction or when the authorised development is operational.
- 4 The Order seeks powers to compulsorily acquire land and new rights (both temporary and permanent) for the purposes of the construction, operation and maintenance of the authorised development. Some of the plots identified in Part 1 of the Book of Reference will be subject to acquisition of permanent rights (including restrictive covenants) pursuant to Article 20 (Compulsory acquisition of rights) and Schedule 7 (Land in which only new rights etc. may be required) of the Order. These plots are shown coloured blue on the land plans.

- 5 Plots that are subject to powers of temporary possession only, such as for the purpose of access or areas only required during construction are listed in Schedule 6 of the Order and shown coloured yellow on the land plans.
- 6 The colours shown on the land plans indicate the type of acquisition sought as set out in the Table 1 below.

Table 1: Land plan colours and their associated descriptors as used in the Land Plans and Book of Reference relating to acquisition

COLOUR OF THE PLOT ON LAND PLANS	<u>DESCRIPTION OF ACQUISITION SOUGHT AS DESCRIBED ON THE LAND PLANS</u>	DESCRIPTION OF ACQUISITION SOUGHT <u>AS DESCRIBED IN THE IN BOOK OF REFERENCE</u>	ACQUISITION SOUGHT	PRINCIPAL RELEVANT DCO ARTICLE(S)
Pink	<u>Land Subject to Temporary Occupation and Use and Freehold Acquisition</u>	"Acquisition of freehold"	Compulsory acquisition of all interests and rights in land (including as required, subsoil, surface land)	Articles 18, 20
Blue	<u>Land Subject to Temporary Occupation and Use and Acquisition of Permanent Rights</u>	"Acquisition of new rights and imposition of restrictions" and	Creation and compulsory acquisition of new rights (including where necessary, a right to impose	Articles 20, 22

		“Acquisition of new rights”	restrictive covenants)	
Yellow	<u>Land Subject to Temporary Occupation and Use</u>	“Temporary possession”	Temporary possession and use of land, primarily during construction	Articles 27, 28

- 7 The Applicant has taken the cautious approach of seeking powers of compulsory acquisition (or rights of [usepossession](#)) in respect of all plots of land required for the scheme even where it already holds an interest or presumes it holds an interest in the land. This approach has been taken to ensure that it has the right to acquire the interests it needs in the whole of the Order limits even where an unidentified owner later asserts an interest in land which the Applicant believes it owns or has rights.

2 Rights which may be acquired

- 8 For plots in which rights are to be acquired or restrictive covenants are to be imposed, the rights sought for the authorised development have been categorised as shown in the Table 2 below. This means that where the entry in this Book of Reference specifies that 'all-cable rights' are to be acquired, all of the rights shown in the cable rights [and restrictive covenants](#) line of table will be sought. Where only some of a category of rights is required the specific rights sought will be listed for the relevant plot.
- 9 In some cases more than one type of rights will be sought in a single plot. In such cases, the category includes all of the rights required. For example, where access rights and rights to carry out and maintain mitigation works are both required in one plot, the class created includes both. For example cable rights to install, operate and maintain the cable and restrictive covenants to protect the cable once it has been installed will be required on the cable route plots. The categories of rights have been created so that each plot only appears under one class.

3 Structure of this book of reference

10 This Book of Reference is comprised of five Parts, in accordance with Regulation 7(1) of the Regulations, as follows:

- Part 1 contains the names and addresses of those who own, lease, occupy or have another interest in the land that will be affected by the authorised development and the rights contained in the Order. A person is within Category 1 if the Applicant after making diligent inquiry, knows that they are an owner, lessee, tenant, or occupier of the land. A person is within Category 2 if they are interested in the land or have the power to sell and convey or release the land.

Parties recorded in Part 3 of this Book of Reference have also been included in Part 1.

- Part 2 lists persons who may be entitled to make a relevant claim, also called category 3 persons. A person is within Category 3 if the Applicant believes that, if the Order were to be made and fully implemented, they would or might be entitled to make a relevant claim as defined in section 57(6) of the 2008 Act. A relevant claim is a claim under section 10 of the Compulsory Acquisition Act 1965, a claim under part 1 of the Land Compensation Act 1973, or a claim under section 152(3) of the 2008 Act. This part therefore contains the names and addresses of those who have an interest in the Order land and may be entitled to claim compensation for loss resulting from the implementation of the Order and use of the authorised development. This part also contains the names and addresses of those without an interest in the Order land, who may be entitled to claim compensation for loss resulting from the implementation of the Order and use of the authorised development;
- Part 3 contains the names and addresses of those entitled to enjoy easements or other private rights which it is proposed may be extinguished, suspended or interfered with in connection with the authorised development, pursuant to the Order;
- Part 4 identifies plots in which there is a Crown interest that will be affected by the authorised development and the rights contained in the Order; and
- Part 5 identifies plots which constitute "special category land" for the purposes of section 132 of the Planning Act 2008 that will be affected by the authorised development and the rights contained in the Order. This is land -

- the acquisition of which is subject to special parliamentary procedure;
- which is special category land
- which is replacement land

The [special category land includes land identified as open space](#). The Applicant believes that if the [Order land open space](#) listed within Part 5, when burdened with the Order right, will be no less advantageous than it was before to the following persons-

- the persons in whom it is vested,
- other persons, if any, entitled to rights of common or other rights, and
- the public.

The Applicant is therefore of the opinion that while it has identified open space within the Order Land, there is no requirement for the provision of replacement or exchange land.

4 Book of reference notes

- 11 Part 1 of this Book of Reference provides the area in square metres of all land included in the DCO. Areas have not been repeated in Parts 2 to 5 of this Book of Reference.
- 12 The term 'approximately' is used before all plot area measurements as these measurements are given in square metres and each measurement is rounded up to the nearest whole square metre.
