Dear Inspector,

Please add my support for the Rampion Offshore Wind Farm.

I believe SDNPA has reluctantly objected on the issue of significant trench digging across the National Park? I would support a feasible alternative. However, in the scheme of things 'Climate' - we need to go electric fast.

I trust the SDNPA and indeed all regulatory bodies would object vehemently to any plans for a new fuel pipeline to Gatwick (to meet the Airport expansion plans). Mentioned here because of plans for a new fuel pipeline to double capacity to the Esso plant at Heathrow - deemed necessary for the Heathrow Airport expansion.

Similarly, to object to many miles of water pipeline planned around Hampshire and Sussex for the totally unsustainable Southern Water Effluent Recycling Schemes : 40+ miles for the Havant Thicket Reservoir to Otterbourne Water Works, with other planned pipelines linking to Hardham (Pulborough), and between Horsham and Ford (Arundel).

There are much better, sustainable ways to meet our future water supply needs.

With very best wishes,  
Philip Maber
