Subject: Concerns with Rampion 2

You don't often get email from [REDACTED] [Learn why this is important](#)

Hi team

Please find below my concerns with the Rampion 2 project. My PI number is 20045104.

In particular, it would lead to significant traffic delays that so far I have not heard a sufficient response about. In particular, I question the assessment of the impact of the traffic on the A272 and the AQMA in Cowfold, and the effect of the large vehicles planned for use on Kent Street. There are already significant delays on the A272 and Kent Street is absolutely not prepared to manage flow of large vehicles.

Moreover, I am a yet to see sufficient evidence of the impact for flooding in the area. Particularly recently, we have been overcome with flooding in both the proposed building ground and the surrounding area. How will flooding in the area be controlled and managed? Both from the building of Rampion 2 and end state perspective.

Furthermore, I would like to bring to light the results of the Cratemans survey. These have been recognised by Natural England and differ significantly from the output of Rampions survey, so I would heavily question the reliability of the Rampion surveys conducted. It appears as though their risk assessment lacks a fair assessment of the area, which is reflected in the benefits vs cons output as critical details are missed that would harm the area.

I look forward to receiving a response and hope this provides some clarity in what I believe are key details missing.

Best wishes
Luke
