Hi

I have, with all the other commercial fishing reps on the CFWG have struggled to engage with the developer and their FLO on the issue of the Statement of Common Ground along with other vital documentation, therefore we will not be able to sign as there doesn't seem to be any common ground. I recently because of the deadline of the 23rd July requested on numerous occasions a CFWG meeting to try and move issues on, sadly the FLO failed to organise leaving the commercial fishers in some difficulties. If the applicant does submit their draft it is not representative of the issues we have put forward which all are still outstanding.

RWE and SSE have right from the start of the consultation fell well below what we have experienced in the last 15 years with other off shore projects and it seems likely this will continue for the whole project if approval is granted.

I apologise for the late submission but right to date we were hopefully there may be some movement sadly that has not happened.

Please present to planning inspectorate.

Regards

Trevor Armstrong
