Glossary of Acronyms

CEA	Cumulative Effect Assessment
DCO	Development Consent Order
PEIR	Preliminary Environmental Information Report
PINS	Planning Inspectorate
SLVIA	Seascape, Landscape and Visual Impact Assessment
UK	United Kingdom
WTG	Wind turbine generator

Glossary of Unit Terms

GW	Gigawatt
kV	kilovolts
MW	Megawatts

Glossary of Terminology

Applicant	Morecambe Offshore Windfarm Ltd
Generation Assets (the Project)	Generation assets associated with the Morecambe Offshore Windfarm. This is infrastructure in connection with electricity production, namely the fixed foundation wind turbine generators (WTGs), inter-array cables, offshore substation platform(s) (OSP(s)) and possible platform link cables to connect OSP(s).
Inter-array cables	Cables which link the WTGs to each other and the OSP(s).
Landfall	Where the offshore export cables would come ashore.
Morgan and Morecambe Offshore Wind Farms: Transmission Assets	The transmission assets for the Morgan Offshore Wind Project and the Morecambe Offshore Windfarm. This includes the (OSP(s)) ¹ , interconnector cables, Morgan offshore booster station, offshore export cables, landfall site, onshore export cables, onshore substations, 400 kilovolts (kV) cables and associated grid connection infrastructure such as circuit breaker infrastructure. Also referred to in this chapter as the Transmission Assets, for ease of reading.
Offshore export cables	The cables which bring electricity from the OSP(s) to the landfall.
Offshore substation platform(s)	A fixed structure located within the windfarm site, containing electrical equipment to aggregate the power from the WTGs and convert it into a more suitable form for export to shore.
Wind turbine generator (WTG)	A fixed structure located within the windfarm site that converts the kinetic energy of wind into electrical energy.

¹ At the time of writing the Environmental Statement (ES), a decision had been taken that the OSP(s) would remain solely within the Generation Assets application and would not be included within the Development Consent Order (DCO) application for the Transmission Assets. This decision post-dated the Preliminary Environmental Information Report (PEIR) that was prepared for the Transmission Assets. The OSP(s) are still included in the description of the Transmission Assets for the purposes of this ES as the Cumulative Effects Assessment (CEA) carried out in respect of the Generation/Transmission Assets is based on the information available from the Transmission Assets PEIR.

The future of renewable energy

A leading developer in Offshore Wind Projects

1 Introduction

1.1 About the Applicant

1. The Applicant is Morecambe Offshore Windfarm Ltd, a joint venture between Zero-E Offshore Wind S.L.U. (Spain) (a Cobra group company), and Flotation Energy Ltd (Flotation Energy).
2. With 80 years of experience, Cobra is a historically significant Group in the development of industrial infrastructure and service provision, and one of the key players in the renewable energy sector in Spain and Latin America. The Group possesses the capacity and determination to develop, build, and operate industrial and energy infrastructures that demand a high level of service, grounded in excellence in integration, technological innovation, and financial robustness. Their unrivalled knowledge and understanding of floating offshore wind developments is a significant advantage in delivering high quality and efficient projects, coupled with their commitment to environmental stewardship. Their experience as a major player in offshore wind is based on a 50MW project in operation and over 11.2GW under development.
3. Flotation Energy, headquartered in Edinburgh, Scotland, sits at the heart of the energy transition. It's determined to support the big switch to sustainable, clean and affordable energy through the application of innovative offshore wind technology. An ambitious offshore wind developer, Flotation Energy has a 13GW portfolio that covers both fixed and floating developments globally, with projects in the UK, Ireland, Taiwan, Japan and Australia. Whilst Flotation Energy develops projects independently, it also recognises the strategic value of partnership and collaboration to deliver proven, cost-effective solutions.

1.2 Purpose of this document

4. This document, Guide to the Application (Document Reference 1.3), summarises the Development Consent Order (DCO) Application structure for this Project. It is a quick reference guide to the latest version of the application documents.
5. This is a live document and will be updated throughout the examination of this Application. Updates to this document will be made when existing documents are revised or new documents are submitted to the Planning Inspectorate (PINS) by the Applicant.
6. In Natural England's Deadline 2 submission (REP2-037), they requested '*clear signposting of what has been changed in all updated documents submitted*'. Therefore, **Appendix A** has been included to provide a record of updates and changes made to documents and plans throughout Examination.

2 Document categories

7. For ease of reference and navigation, documents for this DCO Application are grouped into volumes set out in **Table 1**. It follows, whenever possible, the structure described in Appendix 1 of the PINS Advice Note Six (PINS, 2017).

Table 1 List of volumes of application

Volume	Details
1. Application	Provides details of the specific application information required by PINS.
2. Plans and Drawings	Contains the plans which show the location of this Project, the proposed works plans and other plans related to powers sought in the DCO.
3. Draft Development Consent Order	Sets out the legal powers sought by the Applicant for this Project.
4. Reports and Statements	Contains documents required to be submitted with the DCO Application, including the Consultation Report.
5. Environmental Statement	Contains information showing how the Applicant has assessed the potential impact on the environment.
6. Other Documents	Includes additional documents produced in support of the Application.
7. Pre-examination response to S51 Advice and Initial Response to Rule 9 Letter	The Applicant's response to S51 Advice and Initial Response to Rule 9 Letter submitted to PINS in the pre-examination period.
8. Procedural Deadline A	Documents submitted to PINS by the Applicant at Procedural Deadline A.
9. Examination Documents	Documents submitted to PINS by the Applicant during the Examination.

3 Master document list

8. **Table 2** sets out a list of all documents submitted for the DCO Application for this Project. The list will be updated when existing documents are revised, or new documents are submitted by the Applicant to PINS.

Table 2 Master Document List - Submission made to PINS (green = previously submitted, orange = being submitted)
