Dear sir/Madame,

I'm writing on behalf of Mrs Ivy Salt, [REDACTED]

I am very surprised that no contact has been orchestrated between yourselves and Mrs Salt re the construction of your solar farm.

Considering that it will directly affect her and her property.

I can see that you are expanding on what was previously presented !

What are the proposals for,

1. Hedge management, will room be left to get tractor's between your fencing and the hedges? What is the fencing constructed from ?
2. Tracks and crossings over the Rosliston Road, which tends to flood after any rain fall. Is this being widened to?
3. Traffic management.
4. Fire and emergency plans for the substation?
5. Dust and. Debris during the building process.
6. The pipes going under the road, what will happen to the utilities that are under the road, the gas main has been dug up twice recently and repaired
7. The brook that goes from my farm underneath the road carries clean water from corner farm and new corner farm septic tank, have you knowledge of this ?
8. Wildlife disturbance
9. Lorries using the correct route, not taking shortcuts, who will manage this day to day ?
10. What happens till the new bridge is built in Walton?

This project seems to be failing the local villages for not a huge gain.

Yours sincerely

Mr Robert Salt (son)
