Hi [REDACTED],

By way of update, the section 106 has been executed by Cory. The document is currently with TWUL for execution where we understand that only one final internal approval is awaited to enable them to undertake that execution, and that they are aware of the need for the timeliness of that given Wednesday's deadline.

The plan is then to have the document couriered to LBB to seek to enable completion and sending to the Department to happen on the same day. We will update you further on Monday as to the progress on both these steps, and Cory's position in light of what progress has been made by that point.

Many thanks.
