Dear Sir

Thank you very much for your invitation to comment on the responses received to your letter of the 4th September 2025. The number of loose ends remaining and promises of resolution in months/by the time of the DCO decision, is illustrative of the unprofessional approach of the applicant. Surely after four years, discussions with parties such as KCC, environment agency, Colt Technologies LTD, Lumen Technologies LTD, Southeast Water, OpenReach and the department of transport should be complete? This applicant has displayed a lack of flexibility from the very first consultation in our parish to date. We believe that this is the reason that agreements are still lacking with the important stake holders contacted by yourself.

With regards to the response from the applicant items 10 and 11 easement rights freehold landowners, we would like to ask why all the landowners impacted by the proposed development of the Stonestreet Green Solar are not named in the list provided?

Yours sincerely

Emily Arnold

Clerk to Aldington and Bonnington Parish Council
