

Response to:
Applicants Written Summary of the Applicant's Oral Submissions:
Open Floor Hearing 2

- Number of Solar Panels

The Applicant is still unable to provide details of the exact number of solar panels or BESSs due to technology changes but has provided a worst case scenario for the BESSs of 76.

Q Please can the Applicant provide the worst case scenario for solar panels?

- 2.5.2 The Applicant has not been able to locate the WHO publication, and welcomes further details from the Interested Party. Please find below:
Under 2.5.1 The Applicant requested further information as to the Submission ID 28466, submitted by the World Health Organization (WHO), recommends that solar farms be located at least 2 miles from residential properties.
Submission ID: 28466
Submitter: World Health Organization (WHO)
Recommendation: Solar farms should be located at least 2 miles from residential properties.
