1.0 INTRODUCTION

1.1 Overview

- 1.1.1 This Biodiversity Net Gain (BNG) Report has been prepared to accompany the application for development consent for the East Park Energy project (the ‘Scheme’).
- 1.1.2 This BNG Report has been prepared with reference to **Environmental Statement (ES) Chapter 7: Ecology and Biodiversity [EN010141/DR/6.1]** and based on the Illustrative Landscape Proposals at Appendix A of the **outline Landscape and Ecological Management Plan (oLEMP) [EN010141/DR7.7]**. The final LEMP will ensure that the detailed design of the scheme will be in substantial accordance with the illustrative landscape proposals set out in Appendix A of the oLEMP, as secured by a Requirement of the **draft DCO [EN010141/DR/3.1]**.
- 1.1.3 The Scheme is described in full in **ES Chapter 2: The Scheme [EN010141/DR/6.1]**, however briefly comprises a new ground-mounted solar photovoltaic energy generating station and an associated on-site battery energy storage system (BESS) and 400 kV substation on land to the north-west of St Neots. The Scheme would allow for the generation and export of 400 MW of electricity to the National Grid from the solar photovoltaic energy generating station, and would be capable of exporting and importing up to 100 MW via the BESS. The design life of the Scheme is 40 years, with decommissioning to commence 40 years after final commissioning.
- 1.1.4 This report shows how the Defra Statutory Biodiversity Metric has been utilised in order to calculate the number of biodiversity units that the Site represents at baseline, and how this is predicted to based on the Illustrative Landscape Proposals at Appendix A of the **oLEMP [EN010141/DR/7.7]**.

1.2 Site Overview

- 1.2.1 The Site comprises four distinct areas (East Park Sites A to D) joined with cable and grid connection corridors, as described below and shown on **ES Vol 3 Figure 1-2: Site References [EN010141/DR/6.3]**.

East Park Site A

- 1.2.2 East Park Site A, west of B660 Kimbolton road and B660 Pertenhall Road, predominantly consists of large arable fields planted with cereal crops at the time of survey. Fields are typically bounded by species-poor hedgerows dominated by hawthorn and blackthorn, but also variously including field maple, ash, oak, dog rose, sycamore, hazel.
- 1.2.3 Within the north of East Park Site A lies the Pertenhall Brook, while more natural at the western extent, the watercourse becomes more open and heavily modified towards the east of East Park Site A, including the straightening and deepening of the channel. At the western extent and along the southern bank in particular are mature tree lines of ash and willow, with unmanaged grassland in more open areas towards the east of the Site.
- 1.2.4 Habitats immediately beyond the East Park Site A boundary include further arable fields, blocks of plantation broadleaved woodland, as well as the existing Manor Farm solar array.

East Park Site B

- 1.2.5 East Park Site B, east of B660 Pertenhall Road, similarly comprises agricultural habitats consisting of cereal crops and non-cereal (legume) crops. Fields typically have modified grassland margins consisting of common species typical of agricultural landscapes.
- 1.2.6 Fields are bounded by hedgerows, typically species-poor and dominated by hawthorn and blackthorn but variously also containing oak, ash, willow, elder and sycamore. Ditches are also present, as well as some small streams that are tributaries of the Pertenhall Brook.

-
- 1.2.7 A few small areas of broadleaved woodland are located within Site B.
- 1.2.8 Habitats immediately beyond the East Park Site B boundary include further arable fields, with the village of Little Staughton to the South.

East Park Site C

- 1.2.9 East Park Site C surrounding New Wood consists predominantly of arable fields bounded by ditches and with modified grassland margins.
- 1.2.10 New Wood is located centrally in the parcel, which is an oak dominated woodland with evidence of use for gamebird rearing.
- 1.2.11 The River Kym is present to the north of Site C; the river is approximately 5m wide and with banks modified by reprofiling. The river is lined with trees including ash and willow and grassland bank tops.
- 1.2.12 Habitats immediately beyond the East Park Site C boundary include further arable fields, with the village of Staughton Highway to the north.

East Park Site D

- 1.2.13 East Park Site D comprises predominantly arable fields with small blocks of woodland and scrub on the western boundary, as well as recent hedgerow planting. Field boundaries are less well established in this Site.
- 1.2.14 Habitats immediately beyond the East Park Site D boundary include further arable fields. High wood, a small woodland block, and a solar farm is present to the south of East Park Site D.

Cable Corridor B - C – East Park Site B to Site C

- 1.2.15 The cable corridor connects East Park Site B and C across an unnamed road and arable fields.

Cable Corridor C - D – East Park Site C to Site D

- 1.2.16 The cable corridor connects East Park Site C and D across Moor Road and an arable field.

Grid Connection – East Park Site D to Eaton Socon Substation

- 1.2.17 The Grid Connection connects East Park Site D to the Eaton Socon Substation and crosses open arable fields, Duloe Brook, Duole Road and Bushmead Road.
- 1.2.18 Habitats adjacent to the Grid Connection predominantly consist of arable land but also includes Huntington Wood (ancient woodland and County Wildlife Site).

1.3 BNG Statement

- 1.3.1 The Scheme is not subject to statutory BNG requirements. The Government's target date for the application of mandatory BNG for Nationally Significant Infrastructure Projects (NSIPs) is May 2026¹, at which point development consent order (DCO) applications would be required to demonstrate a quantifiable BNG of at least 10% under the Environment Act 2021.
- 1.3.2 A BNG assessment has been undertaken utilising Defra's Statutory Biodiversity Metric Calculator², to provide evidence of achievable on-site increase in habitat, hedgerow and watercourse units associated with the Scheme.
- 1.3.3 This document (and accompanying the accompanying Biodiversity Metric Spreadsheet in Appendix A) outlines the pre-development and project post-development biodiversity value.
- 1.3.4 There has been no known degradation of the Site, and as such baseline habitats are taken to be those recorded during baseline habitat surveys as described in Section 2.

¹ <https://consult.defra.gov.uk/biodiversity-net-gain/biodiversity-net-gain-for-nationally-significant-i/> [Last Accessed: 12/08/2025].

² <https://www.gov.uk/government/publications/statutory-biodiversity-metric-tools-and-guides> [Last Accessed: 20/03/2025].

- 1.3.5 A total of eighteen veteran trees and five trees exhibiting veteran features were identified through the Arboricultural assessment. Huntingdonshire Wood area of ancient woodland is located immediately adjacent to the grid connection corridor.

1.4 BNG Context

- 1.4.1 Achieving BNG requires developers to include habitat creation and enhancement in plans for new building and infrastructure projects. In order to demonstrate BNG, developments must be designed to increase the level of biodiversity compared to what existed pre-development; in most cases by creating and enhancing natural features within the boundary of the specific development, or else by contributing to the creation and management of biodiversity areas locally or nationally. The application must show how habitats can be created or enhanced so that there will be an overall increase in the unit value compared to the value calculated from the ecological baseline surveys (pre-development).
- 1.4.2 In order to demonstrate a measurable increase in both habitat and hedgerow units, Defra's Statutory Biodiversity Metric ('the Metric') has been used to calculate numerical values (units) for defined habitat, hedgerow and watercourse features. The metric utilises a range of factors to calculate these values; the area measured in hectares, the distinctiveness of the habitat (intrinsic value and rarity), the condition (quality), and strategic significance (ecological value based on location).³
- 1.4.3 In order to claim a BNG, as detailed within The Statutory Biodiversity Metric User Guide (Defra, 2024)⁴, a new development must adhere to certain rules which relate to the use of the Metric, as detailed within **Table 1**. The trading

³ DEFRA (2025). Calculate biodiversity value using the biodiversity metric. Available at: <https://www.gov.uk/guidance/biodiversity-metric-calculate-the-biodiversity-net-gain-of-a-project-or-development> [Last Accessed: 20/03/2025].

⁴ DEFRA (2024). The Statutory Biodiversity Metric User Guide. Available at: https://assets.publishing.service.gov.uk/media/669e45fba3c2a28abb50d426/The_Statutory_Biodiversity_Metric_-_User_Guide_23.07.24_.pdf [Last Accessed: 20/03/2025].

rules in the Metric set out requirements for the type of new habitat which is acceptable as compensation for the loss of another habitat; broadly, habitats must be replaced like-for-like or better.

Table 1: Biodiversity Metric Rules

Rule	Detail
Rule 1	The trading rules of this biodiversity metric must be followed.
Rule 2	Biodiversity unit outputs, for each type of unit, must not be summed, traded, or converted between types. The requirement to deliver at least a 10% net gain applies to each type of unit.
Rule 3	To accurately apply the biodiversity metric formula, you must use the statutory biodiversity metric calculation tool or small sites biodiversity metric tool (SSM) for small sites.
Rule 4	In exceptional ecological circumstances, deviation from this biodiversity metric methodology may be permitted by the relevant planning authority.

2.0 METHODOLOGY

2.1 Habitat Survey and Condition Assessment

- 2.1.1 Habitat data collected from the extended habitat survey (gathered using the UK Habitat Classification (UKHab)⁵ (see **ES Vol 2 Appendix 7-1: Ecological Baseline Report [EN010141/DR/6.2]** for further details) was used to assign a habitat type to each habitat parcel within the Metric. Where no direct habitat translation between UKHab and the Metric exists, professional judgement was used.
- 2.1.2 An assessment of habitat condition was undertaken alongside the extended habitat surveys. Habitats were assessed in accordance with the relevant habitat condition criteria for the specific habitat type contained within condition assessment criteria⁶ published alongside the Metric.
- 2.1.3 Proposed landscaping shown and described within the **outline Landscape and Ecological Management Plan (oLEMP) [EN010141/DR7.7]** has been directly assigned a UKHab category, with reference to the UKHab resources and using professional judgement. The target condition of these habitats was assigned based on the likely achievable condition of the proposed habitat type, taking into account local conditions (e.g., soil nutrient levels) and proposed management. The **oLEMP [EN010141/DR/7.7]** sets out how the habitats within the Site would be created, managed and monitored to deliver the target conditions.

Limitations

- 2.1.4 Following guidance within the Metric User Guide, a precautionary approach was taken to assessing baseline conditions, whereby any condition criteria

⁵ www.ukhab.org

⁶ DEFRA (2024). *Statutory Biodiversity Metric Condition Assessments*. Available at: https://www.gov.uk/government/publications/statutory-biodiversity-metric-tools-and-guides?fbclid=IwAR3t_S8dJN97HZzsb8H9ISdfVqDiUZJcSR7pp4Kz5zHRFK5KWoLjPBImRcw [Last Accessed 21/03/2025].

that could not be measured (e.g., due to the time of year or recent mowing) were assumed to have been passed.

2.2 River Condition Assessment

- 2.2.1 River Condition Assessment was undertaken following the Modular River Physical (MoRPh) survey methodology.
- 2.2.2 The MoRPh survey⁷ is a hydro-morphological assessment method that includes many of the Environment Agency's River Habitat Survey⁸ components and so provides compatible information. However, it provides a number of modifications and additions that allow it to deliver a more detailed local picture of a river and its margins than the River Habitat Survey method.
- 2.2.3 The MoRPh survey was undertaken on 14th - 16th July 2025 by a consultant certified to undertake Modular River Survey River Condition Assessments and to interpret River Corridor Assessment Indicators and Scores for baseline and post-intervention River Metric scenarios.
- 2.2.4 During a MoRPh survey, information is gathered from three river units of different sizes (module, sub-reach, reach) based upon both primary field survey and secondary sources, e.g., map data. Module (MoRPh) and sub-reach (MultiMoRPh) surveys are conducted in the field using the MoRPh survey method, focusing on a single river channel and its immediate margins. The length of the MoRPh module is approximately double the width of the river channel up to a maximum 40 m length. The survey module extends 10m back from the bank tops on both sides of the river to characterise the riparian zone.
- 2.2.5 For the purpose of surveying the Site, the MultiMoRPh5 methodology was chosen, this methodology allows entire reaches to be surveyed using sub-reaches covering a minimum of 20% of the reach's total length, effectively balancing local sub-reach MoRPh detail with overall reach coverage. The

⁷ https://modularriversurvey.org/wp-content/uploads/MoRPh-Manual-ver-14_Oct22.pdf [Last Accessed 21/03/2025].

⁸ <http://www.riverhabitatsurvey.org/> [Accessed 20/03/2025].

MultiMoRPh5 survey locations are shown in **Figure 1: Modular River Physical Survey Location Plan**. Watercourses assessed as being culverts or ditches are not subject to MoRPh survey. Watercourses within the Scheme subject to MoRPh survey were determined on the basis of being a river or canal, as per the guidance on watercourse type within the Metric User Guide.

- 2.2.6 On completion of the survey, all information was entered into the Cartographer online platform, which determined the river type, and provided indicators of the condition of the sub-reach and an overall condition score for the MoRPh5 sub-reach surveyed. Where the river shape score indicated rivers may be over deep (river shape score of <4), professional judgement was applied and if an adverse effect on floodplain connectivity was observed the condition score was reduced by one class (e.g., moderate to fairly poor).
- 2.2.7 In order to appropriately assess the post-works impacts of the Scheme (positive or negative) upon riverine habitats where impacts would occur to the watercourse (e.g. areas requiring new or updated vehicular crossing points and areas of proposed river corridor habitat enhancements), these changes were modelled as a scenario within the Cartographer platform and the condition forecasted input to the Metric.

Limitations

- 2.2.8 There were no limitations when undertaking the MoRPh Surveys.

2.3 Biodiversity Metric

- 2.3.1 A BNG Assessment has been undertaken using the Defra Statutory Biodiversity Metric². The Metric provides a way of measuring and accounting for changes in the biodiversity value of a site by using habitats as a proxy for biodiversity.
- 2.3.2 The BNG assessment has been undertaken by a suitably experienced ecologist with experience utilising biodiversity metrics.

- 2.3.3 The Metric takes into account a range of factors when calculating the value of a habitat (measured as biodiversity units), including the habitats area/length (measured in hectares/km), its distinctiveness (its intrinsic value and rarity), condition (the quality of the habitat being assessed), and strategic significance (how ecologically valuable is the location). The distinctiveness of a habitat is pre-set within the Metric and cannot be changed.
- 2.3.4 For created habitats additional risk multipliers are assigned to account for the difficulty of creating a particular habitat type, time required to achieve the target condition, and where habitat creation is off site, spatial risk.
- 2.3.5 Units for area habitats (e.g., fields), hedgerows and ditches are accounted for separately in the Metric. Units are not directly interchangeable between habitat types.
- 2.3.6 Habitat areas were calculated using GIS software.
- 2.3.7 Where the value of habitats following works is greater than those at the baseline, a net gain will be predicted, or a net loss predicted where the post-works habitat value is lower than the baseline. In addition, the Metric promotes a 'no down-trading' policy within the Metric, whereby habitat loss must be compensated by habitat of the same value or higher; loss of high distinctiveness habitats such as lowland meadow and broad-leaved woodland must be compensated for on a like-for-like basis.

Strategic significance

- 2.3.8 No Local Nature Recovery Strategy (LNRS) for Bedfordshire⁹ or Cambridgeshire¹⁰ is available at the time of publication, with both strategies due to be published from December 2025.
- 2.3.9 As such, strategic significance was assigned following Table 8 of the Metric user guide. Neither Bedford Borough Council nor Huntingdonshire County

⁹ <https://bedslocalnaturerecoverystrategy.commonplace.is/en-GB/timeline> [accessed 16/09/2025]

¹⁰ <https://cambridgeshirepeterborough-ca.gov.uk/what-we-deliver/environment/lnrs/> [accessed 16/09/2025]

Council have published specific guidance outlining alternative plans or strategies to be used in applying strategic significance. As such strategic significance has been assigned as 'low', unless professional judgement has concluded a habitat is of particular value within the local landscape. In the event professional judgement concludes a habitat is of value, the rationale is explained within the Metric spreadsheet.

Limitations

- 2.3.10 It should be noted that the Metric uses habitats as a proxy for biodiversity and calculates only the relative biodiversity value of a site, and therefore cannot quantify impacts absolutely. The Metric accounts only for direct impacts to habitats, and as such cannot fully quantify all negative or positive impacts resulting from a development.
- 2.3.11 Due to the large number of habitat parcels, habitat types and conditions have been aggregated within the metric spreadsheet.
- 2.3.12 Due to differences in mapping techniques woodland mapped as part of the ecological baseline does not match exactly with that mapped for **ES Vol 2 Appendix 2-2: Arboricultural Impact Assessment [EN010141/DR/6.2]**, and as such lies outside of areas of retained habitat mapped on the Illustrative Landscape Proposals. Given all trees are known to be retained, all areas of woodland have been input as retained with any residual areas taken from the 'species diverse grassland'.
- 2.3.13 The statutory 10% requirement that applies to most Town and Country Planning Act developments (with some exceptions) and for which the Metric was principally designed does not yet apply to DCO developments. As such, a target less than 10% has been set in line with project commitments This results in an error message appearing within the Metric spreadsheet, however the Metric spreadsheet meets all rules and requirements expected of a DCO development.

3.0 BASELINE

3.1 Baseline BNG Assessment

- 3.1.1 Full results of the BNG Assessment can be seen in the Metric spreadsheet for the application, submitted as a separate document. Baseline habitats are shown on **ES Vol 3 Figure 7-3 [EN010141/DR/6.3]**.

Summary of BNG Baseline

- 3.1.2 Baseline habitats within the Site generate 1,835.93 habitat units, 314.61 hedgerow units and 54.97 watercourse units.
- 3.1.3 The Site is dominated by arable habitats and associated modified grassland, with low distinctiveness habitats comprising over 90% of the Site area and generating over 80% of the baseline habitat units. A summary of baseline habitat units present within the Site is shown in **Table 2**.
- 3.1.4 Hedgerows within the Site total 43.44km and generate 314.61 units. Hedgerows are typically assessed as species poor (i.e., have fewer than five species per 30m length) with these making up 36.25km (83%) over the total length. Hedgerows are found in association with ditches and also with trees. To a lesser extent, lines of trees are also present.
- 3.1.5 Watercourses within the Site total 11.4km, of which 3.17km are rivers and streams (the Duloe Brook, Pertenhall Brook, tributary of Pertenhall Brook and tributary of river Kym) and the remainder are typical agricultural field ditches. The aforementioned rivers and streams generate 21.96 biodiversity units with field ditches generating the remaining 33.01 units.

Table 2: Baseline habitats by distinctiveness

Distinctiveness	Habitat Type	Area		Units	
		Hectares	% of total	Units	% of total
High	Lowland mixed deciduous woodland	0.5542	0.07%	5.4606	0.30%
	Ponds (priority habitat)	0.0092	0.00%	0.0552	0.00%
	High Total	0.5634	0.07%	5.5158	0.30%
Medium	Arable field margins cultivated annually	0.2624	0.03%	1.0496	0.06%
	Arable field margins game bird mix	3.2194	0.42%	12.8776	0.70%
	Arable field margins pollen and nectar	4.2771	0.55%	17.1084	0.93%
	Mixed scrub	5.5914	0.72%	63.744	3.47%
	Other neutral grassland	24.9838	3.23%	201.1264	10.96%
	Other woodland; broadleaved	4.4074	0.57%	37.8408	2.06%
	Medium Total	42.7415	5.53%	333.7468	18.18%
Low	Cereal crops	540.8788	69.97%	1081.7576	58.92%
	Modified grassland	48.1649	6.23%	186.473	10.16%
	Non-cereal crops	112.6415	14.57%	225.283	12.27%
	Winter stubble	1.575	0.20%	3.15	0.17%
	Low Total	703.2602	90.97%	1496.6636	81.52%
Very Low	Artificial unvegetated, unsealed surface	0.5114	0.07%	0	0.00%
	Built linear features	23.5432	3.05%	0	0.00%
	Developed land; sealed surface	2.4129	0.31%	0	0.00%
	Very Low Total	26.4675	3.42%	0	0.00%
Grand Total		773.0326	100.00%	1835.9262	100.00%

4.0 POST-DEVELOPMENT

4.1 Post-Development BNG Assessment

- 4.1.1 Full results of the BNG Assessment can be seen in the Metric spreadsheet at Appendix A.

Summary of Post-Development BNG

- 4.1.2 A breakdown of the habitats proposed to be created and enhanced, including their target condition is summarised in **Table 3**.
- 4.1.3 To satisfy trading rules, an area of species diverse grassland measuring 7.5ha has been input as arable field margins – tussocky. It is acknowledged that this habitat type is not an exact match however the habitats are considered functionally equivalent. These areas are located at the edge of fields, are within a largely arable landscape and will support a similar species assemblage including invertebrates, birds and small mammals. Further, arable field margins have a lower biodiversity unit value than species diverse grassland.

Table 3: Summary of Biodiversity Net Gain Objectives

Landscape Habitat Type	BNG Habitat Type	Condition Sheet	Target Condition	Targeted Criteria	Time to Target Condition (Years)
Proposed Native Species Woodland or Woodland Belt	Other woodland; broadleaved	Woodland	Poor	N/A – poor condition targeted	5
Proposed Species-	Arable Field Margins; Tussocky	N/A	N/A	N/A	1

Landscape Habitat Type	BNG Habitat Type	Condition Sheet	Target Condition	Targeted Criteria	Time to Target Condition (Years)
Diverse Grassland	Other neutral grassland	Grassland (Medium, high and very high distinctiveness)	Moderate	A, B, C, D	5
Proposed Grazing Pasture or Neutral Grassland (within solar fence line)	Modified grassland	Grassland (Low distinctiveness)	Moderate	C, E, F, G	4
Proposed native species hedgerow	Native hedgerow (species rich)	Hedgerow	Moderate	A1, A2, B1, B2, C2, D1, D2	5
Hard surface including buildings and access tracks	Developed land; sealed surface	N/A	N/A	N/A	N/A
Individual tree	Rural tree	Individual Tree	Poor	N/A	10

5.0 DISCUSSION

5.1 Evaluation

- 5.1.1 Based on the Illustrative Landscape Proposals, the Scheme has the potential to result in an overall net gain of +1459.81 (79.51%) habitat units, 116.13 (36.91%) hedgerow units and +3.27 (5.95%) watercourse units.
- 5.1.2 The Scheme meets all trading rules within the Metric.
- 5.1.3 Measures relating to the creation, management and monitoring of habitats created and enhanced, as well as other biodiversity enhancement measures, are set out within the **oLEMP [EN010141/DR/7.7]**. The final LEMP will be prepared in substantial accordance with the oLEMP and will be subject to approval by the relevant LPA.
- 5.1.4 While a 10% gain is not achieved in relation to watercourses, the habitat creation measures as shown on the Illustrative Landscape Proposals and to be secured through the **oLEMP [EN010141/DR/7.7]** will enhance the bank top habitat of ditches and watercourses throughout the Site. However, as a result of failures of baseline ditch condition assessment criteria related principally to low water levels and frequent drying (which is outside the control of the Scheme), the bankside habitat enhancement is not taken as enhancing the condition of watercourses within the Metric. Therefore, whilst the Scheme achieves no net loss of watercourse units, the quantitative gain in the Metric does not achieve 10%. The Scheme proposals nonetheless represent a qualitative gain of value to local biodiversity.
- 5.1.5 Overall, it is concluded that the Scheme will deliver a net gain for biodiversity, and that change in units generated as part of the Scheme are proportionate to the levels of impact, with the Scheme providing other qualitative measures to enhance biodiversity, as outlined in **ES Vol 1 Chapter 7: Ecology and Nature Conservation [EN010141/DR/6.1]**.

5.2 Conclusion

5.2.1 At the detailed design stage the Applicant will seek to maximise BNG as far as practicable (as per Design Principle 4.1 secured by the **Design Parameters and Principles Statement [EN010141/DR/7.1]**), and it may be possible to achieve a greater BNG for all habitat types compared to the current assessment of the illustrative design. Nonetheless, as the assessment has been based on an illustrative design, out of caution and to avoid any future compliance issue, the Applicant is electing to claim and commit to a future BNG of:

- 70% net gain in area-based habitat units;
- 30% net gain in hedgerow units; and
- 5% in watercourse units.

5.2.2 This is less than assessed for the illustrative design, but allows future flexibility if required at the detailed design. The Applicant will endeavour at that stage to meet or even exceed the higher BNG totals as assessed in the **BNG Report [EN010141/DR/7.17]**, particularly with regard to watercourse units.

Rocky shore - High energy littoral rock - on peat, clay or chalk	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Rocky shore - Moderate energy littoral rock	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Rocky shore - Moderate energy littoral rock - on peat, clay or chalk	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Rocky shore - Low energy littoral rock	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Rocky shore - Low energy littoral rock - on peat, clay or chalk	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Rocky shore - Features of littoral rock	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Rocky shore - Features of littoral rock - on peat, clay or chalk	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral coarse sediment	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral mud	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral mixed sediments	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Coastal saltmarsh - Saltmarshes and saline reedbeds	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Coastal saltmarsh - Artificial saltmarshes and saline reedbeds	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral seagrass	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral seagrass on peat, clay or chalk	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral biogenic reefs - Mussels	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral biogenic reefs - Sabellaria	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Features of littoral sediment	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Artificial littoral coarse sediment	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Artificial littoral mud	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Artificial littoral sand	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Artificial littoral muddy sand	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Artificial littoral mixed sediments	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Artificial littoral seagrass	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Artificial littoral biogenic reefs	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral sand	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal sediment - Littoral muddy sand	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal hard structures - Artificial hard structures	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal hard structures - Artificial features of hard structures	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Intertidal hard structures - Artificial hard structures with integrated greening of grey infrastructure (IGG)	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲
Watercourse footprint - Watercourse footprint	Not Possible ▲	Not Possible ▲	Not Possible ▲	Not Possible ▲	Not Possible ▲	Not Possible ▲	0
Individual trees - Rural tree	3	2.5	2	1.5	1	Not Possible ▲	Not Possible ▲

Version	Changes made	Date released
Version 1.0.0	Initial statutory version	29th November 2023
Version 1.0.1	Amended to fix an error in the irreplaceable habitats dropdown and minor changes to the working of the tool such as ensuring the rows auto populate correctly and cells adjust their height so error messages can be read	15th December 2023
Version 1.0.2	Updated to correct some labelling errors, minor formula errors and expand width of columns	12th February 2024
Version 1.0.3	Minor formatting errors corrected to ensure text is visible and flags appear correctly, version history sheet added.	23rd July 2024
Version 1.0.4	Tab names – Unit Shortfall changed to Credits Formula Correction in Tab D2 – Column V Formula Correction in Headline Results B19 and M7, correcting a typo in cell output Corrections to UKHab codes in tab G1 Addition of text referencing JNCC Definitions re PH to tab G1 Corrections to cell references in tab G2 Minor Changes to the layout of Area Habitat Trading Summary Corrections to the Credits tiers of Littoral Sea Grass and Lowland Beech and Yew Minor formatting corrections Change of 'Habitats' to 'Area Habitats' where appropriate Change to enhancement rules for IH 'Other Woodland' with changes to formula in columns T and U of A3 and D3	3rd July 2025

🔗 This tool is intended to be used for historic data. Any suggested translation between a phase 1 habitat and metric habitat should not be considered a rule - there may be circumstances where a more appropriate metric habitat may be chosen when ecological expertise is applied.

Phase 1 Habitat	Metric habitat	Distinctiveness band
Woodland	Woodland and forest - Other woodland; mixed	Medium
Broadleaved woodland	Woodland and forest - Other woodland; broadleaved	Medium
Semi-natural broadleaved woodland	Woodland and forest - Lowland mixed deciduous woodland	High
Plantation broadleaved woodland	Woodland and forest - Other woodland; broadleaved	Medium
Coniferous woodland	Woodland and forest - Other coniferous woodland	Low
Semi-natural coniferous woodland	Woodland and forest - Native pine woodlands	High
Plantation coniferous woodland	Woodland and forest - Other coniferous woodland	Low
Mixed woodland	Woodland and forest - Other woodland; mixed	Medium
Semi-natural mixed woodland	Woodland and forest - Lowland mixed deciduous woodland	High
Plantation mixed woodland	Woodland and forest - Other woodland; mixed	Medium
Scrub	Heathland and shrub - Mixed scrub	Medium
Dense / continuous scrub	Heathland and shrub - Mixed scrub	Medium
Scattered scrub	Heathland and shrub - Mixed scrub	Medium
Parkland / scattered trees	Woodland and forest - Wood-pasture and parkland	V.High
Broadleaved parkland / scattered trees	Woodland and forest - Wood-pasture and parkland	V.High
Coniferous parkland / scattered trees	Woodland and forest - Other coniferous woodland	Low
Mixed parkland / scattered trees	Woodland and forest - Wood-pasture and parkland	V.High
Scattered trees	Individual trees - Urban tree	Medium
Scattered trees	Individual trees - Rural tree	Medium
Recently-felled woodland	Woodland and forest - Felled	High
Broadleaved recently felled woodland	Woodland and forest - Felled	High
Coniferous recently felled woodland	Woodland and forest - Felled	High
Mixed recently felled woodland	Woodland and forest - Felled	High
Acid grassland	Grassland - Other lowland acid grassland	Medium
Acid grassland	Grassland - Upland acid grassland	Medium
Unimproved acid grassland	Grassland - Lowland dry acid grassland	V.High
Unimproved acid grassland	Grassland - Upland hay meadows	V.High
Semi-improved acid grassland (Good quality)	Grassland - Upland acid grassland	Medium
Semi-improved acid grassland (Good quality)	Grassland - Other lowland acid grassland	Medium
Semi-improved acid grassland (Poor quality)	Grassland - Modified grassland	Low
Neutral grassland	Grassland - Other neutral grassland	Medium
Unimproved neutral grassland	Grassland - Lowland meadows	V.High
Semi-improved neutral grassland (Good quality)	Grassland - Other neutral grassland	Medium
Semi-improved neutral grassland (Poor quality)	Grassland - Modified grassland	Low
Calcareous grassland	Grassland - Upland calcareous grassland	High
Calcareous grassland	Grassland - Lowland calcareous grassland	High
Unimproved calcareous grassland	Grassland - Lowland calcareous grassland	High
Unimproved calcareous grassland	Grassland - Upland calcareous grassland	High
Semi-improved calcareous grassland (Good quality)	Grassland - Upland calcareous grassland	High
Semi-improved calcareous grassland (Good quality)	Grassland - Lowland calcareous grassland	High
Semi-improved calcareous grassland (Poor quality)	Grassland - Modified grassland	Low
Improved grassland	Grassland - Modified grassland	Low
Marsh/marshy grassland	Wetland - Purple moor grass and rush pastures	V.High
Marsh/marshy grassland	Grassland - Other neutral grassland	Medium
Marsh/marshy grassland	Grassland - Modified grassland	Low
Poor semi-improved grassland	Grassland - Modified grassland	Low
Strandline vegetation coastland	Sparsely vegetated land - Coastal vegetated shingle	High
Sand dune	Sparsely vegetated land - Coastal sand dunes	High
Dune slack sand dune coastland	Sparsely vegetated land - Coastal sand dunes	High
Dune grassland sand dune coastland	Sparsely vegetated land - Coastal sand dunes	High
Dune heath sand dune coastland	Sparsely vegetated land - Coastal sand dunes	High
Dune scrub sand dune coastland	Sparsely vegetated land - Coastal sand dunes	High
Open dune sand dune coastland	Sparsely vegetated land - Coastal sand dunes	High
Maritime cliff coastland	Sparsely vegetated land - Maritime cliff and slopes	High
Hard maritime cliff coastland	Sparsely vegetated land - Maritime cliff and slopes	High
Soft maritime cliff	Sparsely vegetated land - Maritime cliff and slopes	High
Crevice/edge vegetation	Sparsely vegetated land - Maritime cliff and slopes	High
Crevice/edge vegetation	Grassland - Tall herb communities	High
Coastal grassland	Sparsely vegetated land - Maritime cliff and slopes	High
Coastal grassland	Grassland - Lowland meadows	V.High
Coastal grassland	Grassland - Lowland dry acid grassland	V.High
Coastal grassland	Grassland - Other lowland acid grassland	Medium
Coastal heathland	Sparsely vegetated land - Maritime cliff and slopes	High
Coastal heathland	Heathland and shrub - Lowland heathland	High
Standing open water	Lakes - Aquifer fed naturally fluctuating water bodies	V.High
Standing open water	Ditches	Medium
Standing open water	Lakes - High alkalinity lakes	High
Standing open water	Lakes - Low alkalinity lakes	High
Standing open water	Lakes - Marl lakes	High
Standing open water	Lakes - Moderate alkalinity lakes	High
Standing open water	Lakes - Peat Lakes	High
Standing open water	Lakes - Ponds (priority habitat)	High
Standing open water	Lakes - Ponds (non-priority habitat)	Medium
Standing open water	Lakes - Reservoirs	Medium
Standing open water	Lakes - Temporary lakes, ponds and pools	High
Dry dwarf shrub heath	Heathland and shrub - Lowland heathland	High
Dry dwarf shrub heath	Heathland and shrub - Upland heathland	High
Acidic dry dwarf shrub heath	Heathland and shrub - Lowland heathland	High
Acidic dry dwarf shrub heath	Heathland and shrub - Upland heathland	High
Basic dry dwarf shrub heath	Heathland and shrub - Lowland heathland	High
Basic dry dwarf shrub heath	Heathland and shrub - Upland heathland	High
Wet dwarf shrub heath	Heathland and shrub - Lowland heathland	High
Wet dwarf shrub heath	Heathland and shrub - Upland heathland	High
Lichen / bryophyte heath	Heathland and shrub - Lowland heathland	High
Lichen / bryophyte heath	Heathland and shrub - Upland heathland	High
Montane heath / dwarf herb	Heathland and shrub - Mountain heaths and willow scrub	V.High
Dry heath / acidic grass mosaic	Heathland and shrub - Lowland heathland	High
Wet heath / acidic grass mosaic	Heathland and shrub - Lowland heathland	High
Dry heath / acidic grass mosaic	Heathland and shrub - Upland heathland	High
Wet heath / acidic grass mosaic	Heathland and shrub - Upland heathland	High
Bracken	Grassland - Bracken	Low
Continuous bracken	Grassland - Bracken	Low
Scattered bracken	Grassland - Bracken	Low
Other tall herb or fern (Good quality)	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Other tall herb or fern	Grassland - Bracken	Low
Tall ruderal	Sparsely vegetated land - Ruderal/ephemeral	Low
Tall ruderal	Sparsely vegetated land - Tall forbs	Low
Non-ruderal	Sparsely vegetated land - Ruderal/ephemeral	Low
Bog	Wetland - Lowland raised bog	V.High
Sphagnum bog	Wetland - Lowland raised bog	V.High
Blanket bog	Wetland - Blanket bog	V.High
Raised bog	Wetland - Lowland raised bog	V.High
Wet modified bog	Wetland - Transition mires and quaking bogs (H7140)	V.High
Dry modified bog	Wetland - Blanket bog	V.High
Dry modified bog	Wetland - Lowland raised bog	V.High
Flush and spring	Wetland - Fens (upland and lowland)	V.High
Acid/neutral flush	Wetland - Fens (upland and lowland)	V.High
Basic flush	Wetland - Fens (upland and lowland)	V.High
Bryophyte-dominated spring	Wetland - Fens (upland and lowland)	V.High
Fen	Wetland - Fens (upland and lowland)	V.High
Valley mire	Wetland – Oceanic valley mire[1] (D2.1)	V.High
Basin mire	Wetland – Oceanic valley mire[1] (D2.1)	V.High
Floodplain mire	Wetland – Oceanic valley mire[1] (D2.1)	V.High
Bare peat	Wetland - Depressions on peat substrates (H7150)	V.High
Swamp	Wetland - Fens (upland and lowland)	V.High
Marginal and inundation	Wetland - Fens (upland and lowland)	V.High
Marginal and inundation	Wetland - Reedbeds	High
Marginal vegetation	Use the feature that it is within, i.e. River, Lake type etc.	
Inundation vegetation	Wetland - Reedbeds	High
Natural rock exposures and caves (Good quality)	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Natural rock exposures and caves	Sparsely vegetated land - Other inland rock and scree	Medium
Inland cliff (High quality)	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Inland cliff	Sparsely vegetated land - Other inland rock and scree	Medium
Acidic inland cliff	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Basic inland cliff	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Scree	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Acidic scree	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Basic scree	Sparsely vegetated land - Inland rock outcrop and scree habitats	High
Limestone pavement	Sparsely vegetated land - Limestone pavement	V.High
Other natural rock exposure	Sparsely vegetated land - Other inland rock and scree	Medium
Other acidic natural rock exposure	Sparsely vegetated land - Other inland rock and scree	Medium
Other basic rock exposure	Sparsely vegetated land - Other inland rock and scree	Medium
Artificial rock exposures	Sparsely vegetated land - Other inland rock and scree	Medium
Artificial rock exposures	Sparsely vegetated land - Other inland rock and scree	Medium
Artificial rock exposures	Sparsely vegetated land - Other inland rock and scree	Medium
Artificial rock exposures	Sparsely vegetated land - Other inland rock and scree	Medium
Artificial rock exposures	Sparsely vegetated land - Other inland rock and scree	Medium
Artificial rock exposures	Sparsely vegetated land - Other inland rock and scree	Medium
Quarry	Urban - Active sand pit quarry or open cast mine	Low
Spoil heap	Urban - Active sand pit quarry or open cast mine	Low
Mine	Urban - Active sand pit quarry or open cast mine	Low
Refuse tip	Urban - Artificial unvegetated, unsealed surface	V.Low
Cultivated/disturbed ground	Cropland - Cereal crops	Low

Arable	Select most appropriate habitat within the 'Cropland' broad habitat type	Low
Amenity grassland	Grassland - Modified grassland	Low
Ephemeral / short perennial	Sparsely vegetated land - Ruderal/ephemeral	Low
Introduced shrub	Urban - Introduced shrub	Low
Fence	Urban - Built linear features	V.Low
Wall	Urban - Built linear features	V.Low
Built-up areas	Urban - Developed land; sealed surface	V.Low
Caravans	Urban - Developed land; sealed surface	V.Low
Sea wall (artificial materials)	Urban - Developed land; sealed surface	V.Low
Buildings	Urban - Developed land; sealed surface	V.Low
Bare ground	Urban - Vacant or derelict land	Low
Bare ground	Urban - Bare ground	Low

Local Authority List	Application type	Habitat list
Adur and Worthing Borough Council	Householder planning consent	Cropland - Arable field margins cultivated annually
Adur District Council	Full planning consent;	Cropland - Arable field margins game bird mix
Allerdale Borough Council	Hybrid planning consent	Cropland - Arable field margins pollen and nectar
Amber Valley Borough Council	Outline planning consent	Cropland - Arable field margins tussocky
Arun District Council	Reserved Matters	Cropland - Cereal crops
Ashfield District Council	Listed building consent	Cropland - Winter stubble
Ashford Borough Council	Advertisement consent	Cropland - Horticulture
Aylesbury Vale District Council	Lawful Development Certificate (LDC)	Cropland - Intensive orchards
Babergh District Council	Prior notification	Cropland - Non-cereal crops
Barnsley Metropolitan Borough Council	Removal/variation of conditions	Cropland - Temporary grass and clover leys
Barrow-in-Furness Borough Council	Approval of conditions	Grassland - Traditional orchards
Basildon Borough Council	Consent under Tree Preservation Orders	Grassland - Bracken
Basingstoke and Deane Borough Council	Notification of proposed works to trees in conservation areas	Grassland - Floodplain wetland mosaic and CFGM
Bassetlaw District Council	Application for non-material amendments	Grassland - Lowland calcareous grassland
Bath and North East Somerset Council	Nationally Significant Infrastructure Habitats (NSIP'S)	Grassland - Lowland dry acid grassland
Bedford Borough Council		Grassland - Lowland meadows
Birmingham City Council		Grassland - Modified grassland
Blaby District Council		Grassland - Other lowland acid grassland
Blackburn with Darwen Borough Council		Grassland - Other neutral grassland
Blackpool Borough Council		Grassland - Tall herb communities (H6430)
Blaenau Gwent County Borough Council		Grassland - Upland acid grassland
Bolsover District Council		Grassland - Upland calcareous grassland
Bolton Metropolitan Borough Council		Grassland - Upland hay meadows
Borough of Broxbourne		Heathland and shrub - Blackthorn scrub
Borough of Poole		Heathland and shrub - Bramble scrub
Boston Borough Council		Heathland and shrub - Gorse scrub
Bournemouth Borough Council		Heathland and shrub - Hawthorn scrub
Bracknell Forest Council		Heathland and shrub - Hazel scrub
Bradford Metropolitan District Council		Heathland and shrub - Lowland heathland
Braintree District Council		Heathland and shrub - Mixed scrub
Breckland District Council		Heathland and shrub - Mountain heaths and willow scrub
Brentwood Borough Council		Heathland and shrub - Rhododendron scrub
Bridgend County Borough Council		Heathland and shrub - Dunes with sea buckthorn (H2160)
Brighton and Hove City Council		Heathland and shrub - Other sea buckthorn scrub
Bristol City Council		Heathland and shrub - Upland heathland
Broadland District Council		Lakes - Aquifer fed naturally fluctuating water bodies
Bromsgrove District Council		Lakes - High alkalinity lakes
Broxtowe Borough Council		Lakes - Low alkalinity lakes
Buckinghamshire County Council		Lakes - Marl lakes
Burnley Borough Council		Lakes - Moderate alkalinity lakes
Bury Metropolitan Borough Council		Lakes - Peat lakes
Caerphilly County Borough Council		Lakes - Ponds (priority habitat)
Calderdale Metropolitan Borough Council		Lakes - Ponds (non-priority habitat)
Cambridge City Council		Lakes - Reservoirs
Cambridgeshire County Council		Lakes - Temporary lakes ponds and pools (H3170)
Cannock Chase District Council		Sparsely vegetated land - Calaminarian grasslands
Canterbury City Council		Sparsely vegetated land - Coastal sand dunes
Cardiff Council		Sparsely vegetated land - Coastal vegetated shingle
Carlisle City Council		Sparsely vegetated land - Ruderal/Ephemeral
Carmarthenshire County Council		Sparsely vegetated land - Inland rock outcrop and scree habitats
Castle Point Borough Council		Sparsely vegetated land - Limestone pavement
Central Bedfordshire Council		Sparsely vegetated land - Maritime cliff and slopes
Ceredigion County Council		Sparsely vegetated land - Other inland rock and scree
Charnwood Borough Council		Urban - Allotments
Chelmsford City Council		Lakes - Ornamental lake or pond
Cheltenham Borough Council		Urban - Artificial unvegetated, unsealed surface
Cherwell District Council		Urban - Bioswale
Cheshire East Council (Unitary)		Urban - Intensive green roof
Cheshire West and Chester Council		Urban - Built linear features
Chesterfield Borough Council		Urban - Cemeteries and churchyards
Chichester District Council		Urban - Developed land; sealed surface
Chiltern District Council		Urban - Other green roof
Chorley Council		Urban - Facade-bound green wall
Christchurch Borough Council		Urban - Ground based green wall
City of Lincoln Council		Urban - Ground level planters
City of London		Urban - Biodiverse green roof
City of York Council		Urban - Introduced shrub
Colchester Borough Council		Urban - Open mosaic habitats on previously developed land
Conwy County Borough Council		Urban - Rain garden
Copeland Borough Council		Urban - Actively worked sand pit quarry or open cast mine
Corby Borough Council		Individual trees - Urban tree
Cornwall Council (Unitary)		Urban - Sustainable drainage system
Cotswold District Council		Urban - Unvegetated garden
Coventry City Council		Urban - Vacant or derelict land
Craven District Council		Urban - Vegetated garden
Crawley Borough Council		Wetland - Blanket bog
Cumbria County Council		Wetland - Depressions on peat substrates (H7150)
Dacorum Council		Wetland - Fens (upland and lowland)
Darlington Borough Council		Wetland - Lowland raised bog
