

Hello

I would like you to have a site meeting at the top of sandy lane Swinsehead you will have to walk along the B.O.A.T road to the top of the hill once there you will be able to view one of the intended areas for solar panels .

I think the view will say it all,

I don't think we need to despoil this area with the intended solar panels.

This walk is used by many people throughout the year to visit the historic woodlands, this beautiful part of North Bedfordshire should not be spoilt by acres of unsightly plastic panels.

Please come and have a look for your selves, in all honesty there are more suitable places for this type of development .

Thanks Jonathan.
