

I would like the site inspection to include an appraisal of the proposed route for delivery vehicles from the A1 to the B645 through Hail Weston. The route includes a dangerous double bend on a narrow section of road where there have been a number of accidents including fatalities. It will be particularly dangerous for cyclists. As the road is so narrow and bendy it will cause major congestion for people travelling to work and school.

The prediction is for 40 large vehicles to arrive and leave daily during the construction period. That makes potentially 80 arrivals and departures along with the traffic generated by up to 800 workers per day during the construction phase. It will cause major disruption for up to 3 years.
