

I object to the plans of the solar farm due to the following reasons

Harm to wild life on the proposed location, the introduction of the solar farm would ruin the natural habitat to the current wildlife in the area.

Harm to the greenbelt and view of the countryside, there are public foot paths in the area enjoyed by the local community on which would be spoiled by the solar farm.

Negative effect on my property in terms of value and my families enjoyment of the area, the proposed farm is in close proximity to my property on which would be visable from my home.

Increased traffic to the area during construction, the roads are already in a poor stated or repair on which further damage would be caused during the production process, no prevision has been made in the repair or reinstatement of a new road from the damage likely to be caused.
