

North Bedfordshire already has huge solar at Chelveston/Yelden, only a couple of miles from the edge of this proposal. ENOUGH. The only beneficiaries locally are the applicant and a few landowners. Everyone else is subsidising both of the above. The loss of rural countryside is huge. The fencing around the panels ruins any footpaths and bridle ways usage for anyone..who on earth would want to walk or ride between chain link fencing? We know s this is the reality at Chelveston. Great to put solar on roofs, by railways and industrial facilities but NOT on prime agricultural land.
