

i am concerned about the additional traffic to the site. There is already a bottleneck at the A1 Black Cat Roundabout and further traffic will add to the congestion. Further any approaches to the site from A1 and M1 and then onto more local roads which again will lead to further road congestion and pollution. The B661 road from Buckden through to Perry through to Kimbolton and on to Higham Ferrers is nothing but a single carriageway country road and is unsuitable for any construction traffic. Ditto for any other roads in the vicinity too. The length of the construction period is too long.
