

Submission ID: S1605F111

Entrance to Site D (SA16) requires many vehicles moving along the B645, through dangerous bends alongside Meagre Farm (OS153, TL1562). Please view these bends from both directions to see how unsighted they are and why this stretch of road is dangerous and unsuitable for construction traffic on the proposed scale. Please view Sites C and B from behind Little Staughton, All Saints Church so that you can appreciate how the landscape will be ruined and the solar farm cannot be screened from such high points.
