

Submission ID: S48C26139

I strongly OBJECT to the proposal to site the East Park solar project in the valley surrounding several parishes. This is prime agricultural land producing the much needed food we all rely on - even more so now with the current global conflicts.

Solar should be on roof spaces - warehouses, shopping malls, industrial units, houses and the like.

I have previously submitted my heartfelt objections.

Please refer to those - but I OBJECT in the strongest terms siting the previous reasoning.
